Operations Director Administrative Report

04/20/2022

- **The boiler pipe which has caused multiple leaks in the hallway and rooms at Central have been fixed in the hopes this stops our water loss from that area.**
- **There was a broken pipe at the wastewater treatment plant which has now been prepared successfully.**
- **We are at the beginning of the spring sport season. We have already had some shuffling of drivers to do, and our permanent sub is benefiting us tremendously. Such a great group effort of getting students to and from school and sporting events.**
