Operations Director Administrative Report

8/19/2021

- **Bus 17 was removed from the fleet 2 years ago and no longer an asset. The bus was sold last month.**
- **The home side stadium bleachers were inspected by our current architect, and we collaborated to deem these a safety concern due to the footers and pylon conditions. These supports, along with various cement areas in the aisles and walkway, must be repaired to ensure safety. We will be seeking bids and board approval to complete these repairs as soon as possible.**
- **All buses are on site and in use now. Cameras have been received and will be installed by Provision as soon as possible.**
