Operations Director Administrative Report

2/5/2022

- **The compressor that was ordered for the middle school is in place. There was a delay with having the availability to get it in the school. We will have it hooked up no later than this week.**
- **We are in the prime of heating season. Sieb Plumbing and Heating has been very busy repairing coils for the air handlers above the locker rooms. These specific air handlers have not been used in years. We have been diligently working on it so it will soon be back to normal operations.**
- **We have installed more cameras in particular areas of concern in the Middle and High school buildings. These were placed in specific areas that were discussed at our safety meeting. They were placed in low visibility locations surrounding the school.**
