

Mercy Sports Medicine Sports Injury Clinic For Sports Injuries, Bumps, Bruises and Sprains

From August through November, Mercy Sports Medicine offers a sports injury clinic every Saturday morning at Mercy St. Anne Hospital, first floor, 3404 W Sylvania Avenue, Toledo. Patients are asked to start reporting at 7:00 a.m.

The clinic is open to all athletes including junior and senior high school, collegiate and 'weekend warriors'. The comprehensive clinic includes an evaluation and diagnostic imaging, if necessary. All test results are reviewed by a sports medicine physician and a plan of care is developed, tailored to the athlete.

If necessary, additional orthopedic consultations or services are scheduled. If physical therapy or athletic training is needed, a physical therapist or athletic trainer will evaluate the athlete and treatment may begin immediately.

Information provided by Mercy Sports Medicine staff

In addition, Mercy Sports Medicine offers physical therapy and athletic training services on Sunday mornings at Sunforest Court, located at 3930 Sunforest Court, Suite 100, Toledo. With many athletes, this quick intervention allows for an earlier and safe return to play.

Continuing communication, with HIPAA clearance secured, is provided to the athlete's coach and school athletic trainer so playing restrictions are implemented and a functional progression for return to play is set in motion.
