Syllabus

2020-2021

6th Grade Mathematics

CONTACT: Phone 848-9380

Email simmons@eriemason.k12.mi.us

GOAL: My goal is to get every student a basic level of understanding and success in Mathematics. I want every student to improve upon their test scores from previous years and throughout the current year.

RULES: Posted in room:

Be responsible for yourself and your actions.

Be respectful to all.

Be on task and in your seat unless told otherwise.

Follow directions.

Ask questions!!!

GRADING: Using the grading scale in the school handbook, the grade percent will be determined by

80% quizzes and tests (summative assessments)

10% notes

10% homework/classwork (formative assessments)

CURRICULUM: We will follow the grade level expectations set out by the district and state for the 6th grade level. We will use the Holt-McDougal Math book for supplementary material along with the website Study Island.

MY STUDENT EXPECTATIONS:

1. Be on time with all materials everyday.
2. Put forth your best effort for all work all the time.
3. Ask questions.
4. Come in with a good attitude and a willingness to learn.

NECESSARY SUPPLIES:

The necessary materials for Math class are a 1 inch 3 ring binder to keep notes and handouts organized in, lined paper for the binder, pencils to write with and a calculator that has the square root and exponent features. Several larger stores have a \$10 version I can show you that will last throughout Middle School and possibly beyond if they are cared for. Furthermore, if you would like to contribute hand sanitizer, sanitizing wipes and tissue, it would be greatly appreciated.
