

STOWLOCH WHISKEY

AGED 4+ YEARS

Stowloch Whiskey is born using natural Ozark Highlands limestone-filtered water, food-grade corn, wheat and malted barley, long fermentation & then aged a minimum of 4 years in Missouri Oak barrels.

CERTIFIED

Stowloch Whiskey is certified under Missouri law as an "Ozark Highlands" whiskey. This quality standard requires chemical free water from the Ozark Highlands, Missouri-made barrels, & aging of at least 4 years. And the process from birth to bottle must take place in the Ozark Highlands.

SMOOTH & SWEET

The mash build and long fermentation gives Stowloch Whiskey a hint of sweet and a smooth finish. This pre-prohibition recipe, brought to the Americas in 1761, uses traditional distilling to ensure each bottle is truly delicious.

SIZE - 750 ML

BTL/CASE - 12
