

MULTI LTE SIM BONDING ROUTER FOR BANDWIDTH AGGREGATION

TrueBOND30 is An Innovative Router Developed For Enterprise Application Which Depending On LTE,4G,3G It Is Equipped With Four Input And One Output. Inputs Are 3 x LTE SIM SLOT , 1 x WWAN Output Is Gigabit LAN

TrueBOND30 Design to Serve Live Streaming Or High Speed Upload Which Known As Critical Application For Mobile Broadband And 4G,3G.

MAIN FEATURES

4G

4HRS

WiFi WAN

Gigabit Ethernet

DC 12-19V

Dual Cooled

Multipath Enabled

DHCP

DHCP

Firewall

Secure tunnelling

Upto 100 Mbps Bonding

Remotely Upgradable

Web Based GUI

Multi ISP

1 : 1 Server Bandwidth

FREE FOR ONE YEAR WITH THIS DEVICE

1 : 1 Bandwidth

Quad Core CPU

2GB RAM
25GB SSD

Remote Control

Real time Dashboards

Premium Support

- ⚡ DC input: 12V - 19V Variable DC Input
- 🌡️ Temperature range: 5° to +75°C
- 📏 Dimensions: 170*125*50 mm
- 📦 Weight: 690 gr
