

CTE Advisory Committee Handbook

Academic Year 2017/18

FORWARD

Today's rapidly changing society requires that educational institutions and the communities they serve work closely together, especially in Career and Technical Education (CTE) Programs. CTE is an organized system of programs which are directly related to preparation, upgrading or retraining for careers requiring other than a baccalaureate or advanced degree.

Excellence in CTE is the goal of instructors and administrators of the college. It is vital that we align with the needs of our industry partners. Volunteering as advisory committee members brings employers and educators together and provides a format for sharing information and ideas.

Program advisory committees are organized to provide advice and assistance to the instructors and administrators of specific CTE programs. To be sure that students learn the most current skills, employers are an integral part of recommending, designing and updating curriculum and technology.

WHAT IS A PROGRAM ADVISORY COMMITTEE?

A program advisory committee is a representative group of industry partners whose experience and abilities represent a cross section of a particular occupational area or discipline. The primary purpose of the local program advisory committee is to assist and provide recommendations to the district in establishing, operating, and evaluating programs which serve the needs of students, business and industry, and to provide expertise pertaining to technological and subject matter changes.

WHY ARE PROGRAM ADVISORY COMMITTEES NEEDED?

Committees are needed:

- to provide an opportunity for discussion among educators, business, and industry
- to focus on how to improve Career and Technical Education opportunities
- to strive to improve the alignment between CTE, business, and industry
- to provide expertise to the program by reviewing curriculum, technology, facilities, budget, student competencies, and student placement in related occupations

Requirements:

- Local schools and institutions that operate CTE programs and receive state and federal funds, and are required by the Carl D. Perkins Career and Technical Education Act (CTEA) to establish and operate Program Advisory Committees.
- Each CTE Program Advisory Committee is required to meet a minimum of once per year. *SRJC Board Policy 3.13P requires that each Program Advisory Committee meet a minimum of two times per year; once in the fall semester and once in the spring semester.*

WHAT ARE SOME COMMITTEE ACTIVITIES & RESPONSIBILITIES?

Responsibilities:

- commit to attend and participate in all meetings
- suggest and develop agenda items
- develop goals and objectives for the program
- review, analyze, and provide recommendations for program improvement
- respect the rights and opinions of other committee members
- promote CTE programs and student employment

The Program Advisory Committee can assist with the following activities:

Curriculum Development:

- reviewing curriculum materials for outcomes, content, and scope
- identifying competency levels and performance standards
- identifying employability skills
- review instructional materials, technology, and facilities

Public Relations:

- assist in obtaining effective media coverage
- being visible in support of programs during public and special events
- recommending technical resource personnel
- providing classroom speakers from business and industry or providing tours and field trip experiences
- securing additional funding and donations for materials and equipment

Job Placement:

- assisting students with cooperative work force training opportunities and internships
- communicating potential job openings
- providing information and data related to employment demands, trends, and needs

Recruiting:

- assisting in recruiting part time and full time instructors and volunteers
- assisting in recruiting new students and incumbent employee trainees
- assisting in recruiting new advisory committee members and technical resource personnel

Program Evaluation:

- reviewing goals, objectives, topics, and scope of the CTE course/program
- examining outcomes relating to competency and quality of graduates and job placement
- participating on program evaluation teams
- assuring that programs are current, up-to-date, and meet the needs of the industry.

MEMEBERSHIP & MEETINGS

There is no fixed number of members that will satisfy all situations. The membership needs to be large enough to be representative of the discipline and be able to function effectively and efficiently. Generally a membership between five (5) and seven (7) industry partners representing all aspects of the discipline is optimal. Please forward your official membership list (see Appendix D) to the office of the Sr. Dean of Career and Technical Education and Economic Development at the beginning of the fall semester. The committee membership will be submitted to the Board of Trustees for approval at their September board meeting. This is the official list for the academic year and will be used to determine a quorum for your 2017/18 meetings. **A quorum is 50% of the official membership + 1. A quorum must be present in order for a meeting to be official and to conduct business.** Proxy voting will be allowed with confirmation of the proxy shown in the minutes of the meeting.

Members are appointed for one, two, or three-year terms. To ensure continuity in membership, committees should select members for a variety of terms so that they do not come up for appointment at the same time. Committee members may be re-appointed.

To avoid potential conflicts of interest, committee membership shall be non-instructional representatives of the community, business, and industry. If it becomes necessary to use part time instructional faculty as committee members, said members shall recuse themselves from any vote that creates a potential conflict of interest for that person or action item.

Committee members shall have recent related experience to the program of study, committed to attend all meetings, be available to serve their full term and have an interest and commitment in the education of students.

Current and former students now employed in the field or as required by external licensing/accrediting organizations, may also be appointed to the advisory committee.

A chairperson for the advisory committee will be selected from the business and industry membership. The committee chairperson is responsible for facilitating the meeting and in collaboration with the department chairperson, program coordinator, or designated faculty member preparing the agenda. **The agenda shall be forwarded to the office of the Sr. Dean of Career and Technical Education and Economic Development 10 days prior to the meeting.**

The department chairperson, program coordinator, or designated faculty member in collaboration with the committee chair, will be responsible for developing a schedule of meetings for the academic year. Each committee shall meet at least twice per academic year (once in the fall semester and once in the spring semester).

Meetings are open to all interested faculty, staff, administrators, college officials, educational partners, and general public.

Best Practices show that at least one of your advisory meetings should be hosted at an industry partner site. Meeting on campus is preferable when reviewing or discussing facilities, equipment, or technology.

Meetings may be held using web conferencing technology. (Conference calls, GoToMeeting, CCCConfer, Skype, Zoom, etc.). You are encouraged to provide this option in order to secure a quorum of your membership.

The following is a list of stakeholders that should be invited to all advisory committee meetings:
