

# RICHWAY BIOMAT WITH AMETHYST PILLOW

## NATURAL INFRARED RAYS

This wonderful feeling is a dream come true!

### BEST QUALITY AMETHYST (The Safest Energy Source)

Amethyst produces far infrared rays which are believed to help you feel rejuvenated.

### THE FUNCTION OF LONG WAVE INFRARED RAYS: LONG WAVE INFRARED RAYS CHARACTERISTICS:

#### 1) RADIATION

Radiation is one of the general characteristics of light, and this means that light reaches an object without using the air. For example, the sun's light reaches the earth through the vacuum of space by radiation.

#### 2) DEEP IMPACT POWER

Another characteristic is the deep impacting power. Different from ordinary light beams and short wave infrared rays, long wave infrared rays can penetrate deeply. Because of this, they can warm your body from the inside out and stimulate our system.

### ANTIBACTERIAL TEST RESULTS

- Test Method: KFIA-FI-1002
- Name of used bacteria: Staphylococcus aureus ATCC 6538
- Reduction Rate Of Bacteria (%): 99.9%

Staphylococcus aureus ATCC 6538

After 24 hours

AMETHYST PILLOW  
AMAZING HEALING POWER

# AMETHYST PILLOW

## NATURAL INFRARED RAYS

**Get a Good Night's Sleep With an Amethyst and Tourmaline Pillow**  
Better quality elastic memory foam, 100% cotton cover, natural amethyst and natural tourmaline.

Natural Infrared Rays are the safest energy source.  
The power of Amethyst: Amethyst is universally accepted as the healing crystal and has been since ancient times.  
The energy of tourmaline: Tourmaline is abundant, consisting of complex boron and aluminum silicate minerals of variable composition.

THE SAFEST ENERGY SOURCE

# AMETHYST POWER

## NATURAL INFRARED RAYS

### Restore Your Health and Beauty

Amethyst healing has been associated with an art and practice, done on a metaphysical level that has been rediscovered because of the power of the Earth's energies that have been absorbed by these sacred objects. In turn, they inherit vital healing powers.

Some believe that amethyst has physical, spiritual, calming and zodiacal powers that can be used to calm the mind, body and spirit.

Amethyst has come to be known as a power crystal associated with prolific healing powers that can be characterized as purifying, pacifying and transitional.

Amethyst has the ability to transform lower energies into higher ones, and acts as a healer on all levels of mind, body and spirit. The healing powers of Amethyst date back as far as the ancient Greeks who believed that Amethyst protected a person from the intoxicating effects of alcohol. The word "Amethyst" is of Greek origin, and is translated as - "Amethystus" intoxicated ("-methystos" from "methyein" or intoxicated, "methy" = wine).

### Some other qualities it is believed to have are:

- ◆ To calm emotions and reduce stress
- ◆ To increase physical energy
- ◆ To increase stamina

THIS BROCHURE HAS BEEN COMPILED BY PRESENTING MATERIAL (TAKEN OUT OF CONTEXT) FROM THE RESEARCH STUDY OF THE RECORDS OF DOCTORS: DR. TAKADA MAKU, DR. HATASHITA TOSHIUKI, DR. HIROUCHI MITCHIO AND DR. OTA NOBUOI OF TOHO UNIVERSITY HOSPITAL (Funabash City, CHIBA 214), JAPAN. THESE RESEARCH RECORDS WERE DEVELOPED OVER A 40 YEAR PERIOD OF TIME. ## Natural Infrared Rays are the safest energy source

### HEALING WITH AMETHYST

Since ancient times, Amethyst has been universally accepted as the healing crystal. There are a number of ways to incorporate it into a healing practice. Amethyst is a crystal that is believed to purify the body and align the chakras. By transforming energies on all levels, Amethyst also is believed to have the ability to balance and stabilize energies located within certain areas. The benefit of using a crystal lies in the healer being able to "detach" him or herself from the healing process. The healer assigns the healing channel to the crystal, which frees the healer from involvement in the process. The healing process then becomes: universal energy > the Amethyst > the recipient. Notice that the healer and the ego are not part of the process. The healer is able to carry on with a healing session acting solely as the channel. The ego has less opportunity to take the credit for itself, because the healing channel has been assigned to the Amethyst by the healer.

### Clay Cushion

#### ✓ Far infrared ray test

Ochre has the function of far infrared radiation. An ochre cushion includes no harmful chemical substances.

#### ▶ TESTING RESULT

| Emissivity<br>(5~20 μm) | Emissivity Power<br>(W/m <sup>2</sup> · μm, 37°C) |
|-------------------------|---|
| 0.894                   | 3.45 x 10 <sup>2</sup>                            |

■ Test Method: KFA-FI-1005

■ The temperature of 37°C is provided by the applicant. The above experimental results were measured in comparison with BLACK BODY by using the FT-IR Spectrometer.

### Good Sleep:

Amethyst, as a healing stone, is believed to have sobering and calming qualities. This stone is commonly associated with peace. It has been deemed “nature’s tranquilizer” by many healers because of its effectiveness in relaxing the mind. Besides being a stone of tranquility and repose, Amethyst is also believed to enhance mental strength, stability, and vigor.

### ▼ Tourmaline

| Chemistry                | Crystal System | Hardness         |
|--------------------------|----------------|------------------|
| SiO <sub>2</sub> + B, Al | Hexagonal      | 7.0-7.5          |
| Cleavage                 | Fracture       | Specific Gravity |
| None                     | Variable       | 3.0-3.2          |

### Tourmaline:

Tourmalines are abundant, complex boron and aluminum silicate minerals of variable composition. Tourmaline comes in a wide range of colors, depending on its mineral composition. Black is the most common. Colors can vary from clear, to pink, rosy red, yellow, honey, green, blue, violet, brown and black. Some crystals are pink at one end and green at the other. Concentric color zoning often occurs as well. The colored varieties, when transparent and flawless, are cut as gems. In addition to its use as a gem, tourmaline is employed in pressure devices because of its piezoelectric properties. Tourmaline forms slender, 3-, 6-, or 9-sided prismatic crystals (hexagonal system) in parallel or radiating groups, which causes it to develop an electrical charge when heated or deformed. Pieces cut perpendicular to the long axis can polarize light, and a pair of these plates form a very simple polarizing apparatus known as tourmaline tongs.
