OPEN SIZE : 444 mm (W) x 210 mm (H)

### Mission

To provide the most authentic quality of coffee to our consumers and provide equitable returns to producers globally.

### Vision

We strive to become leading coffee supplier globally by creating socio-economic opportunities for the farmers and health and well-being for our consumers.

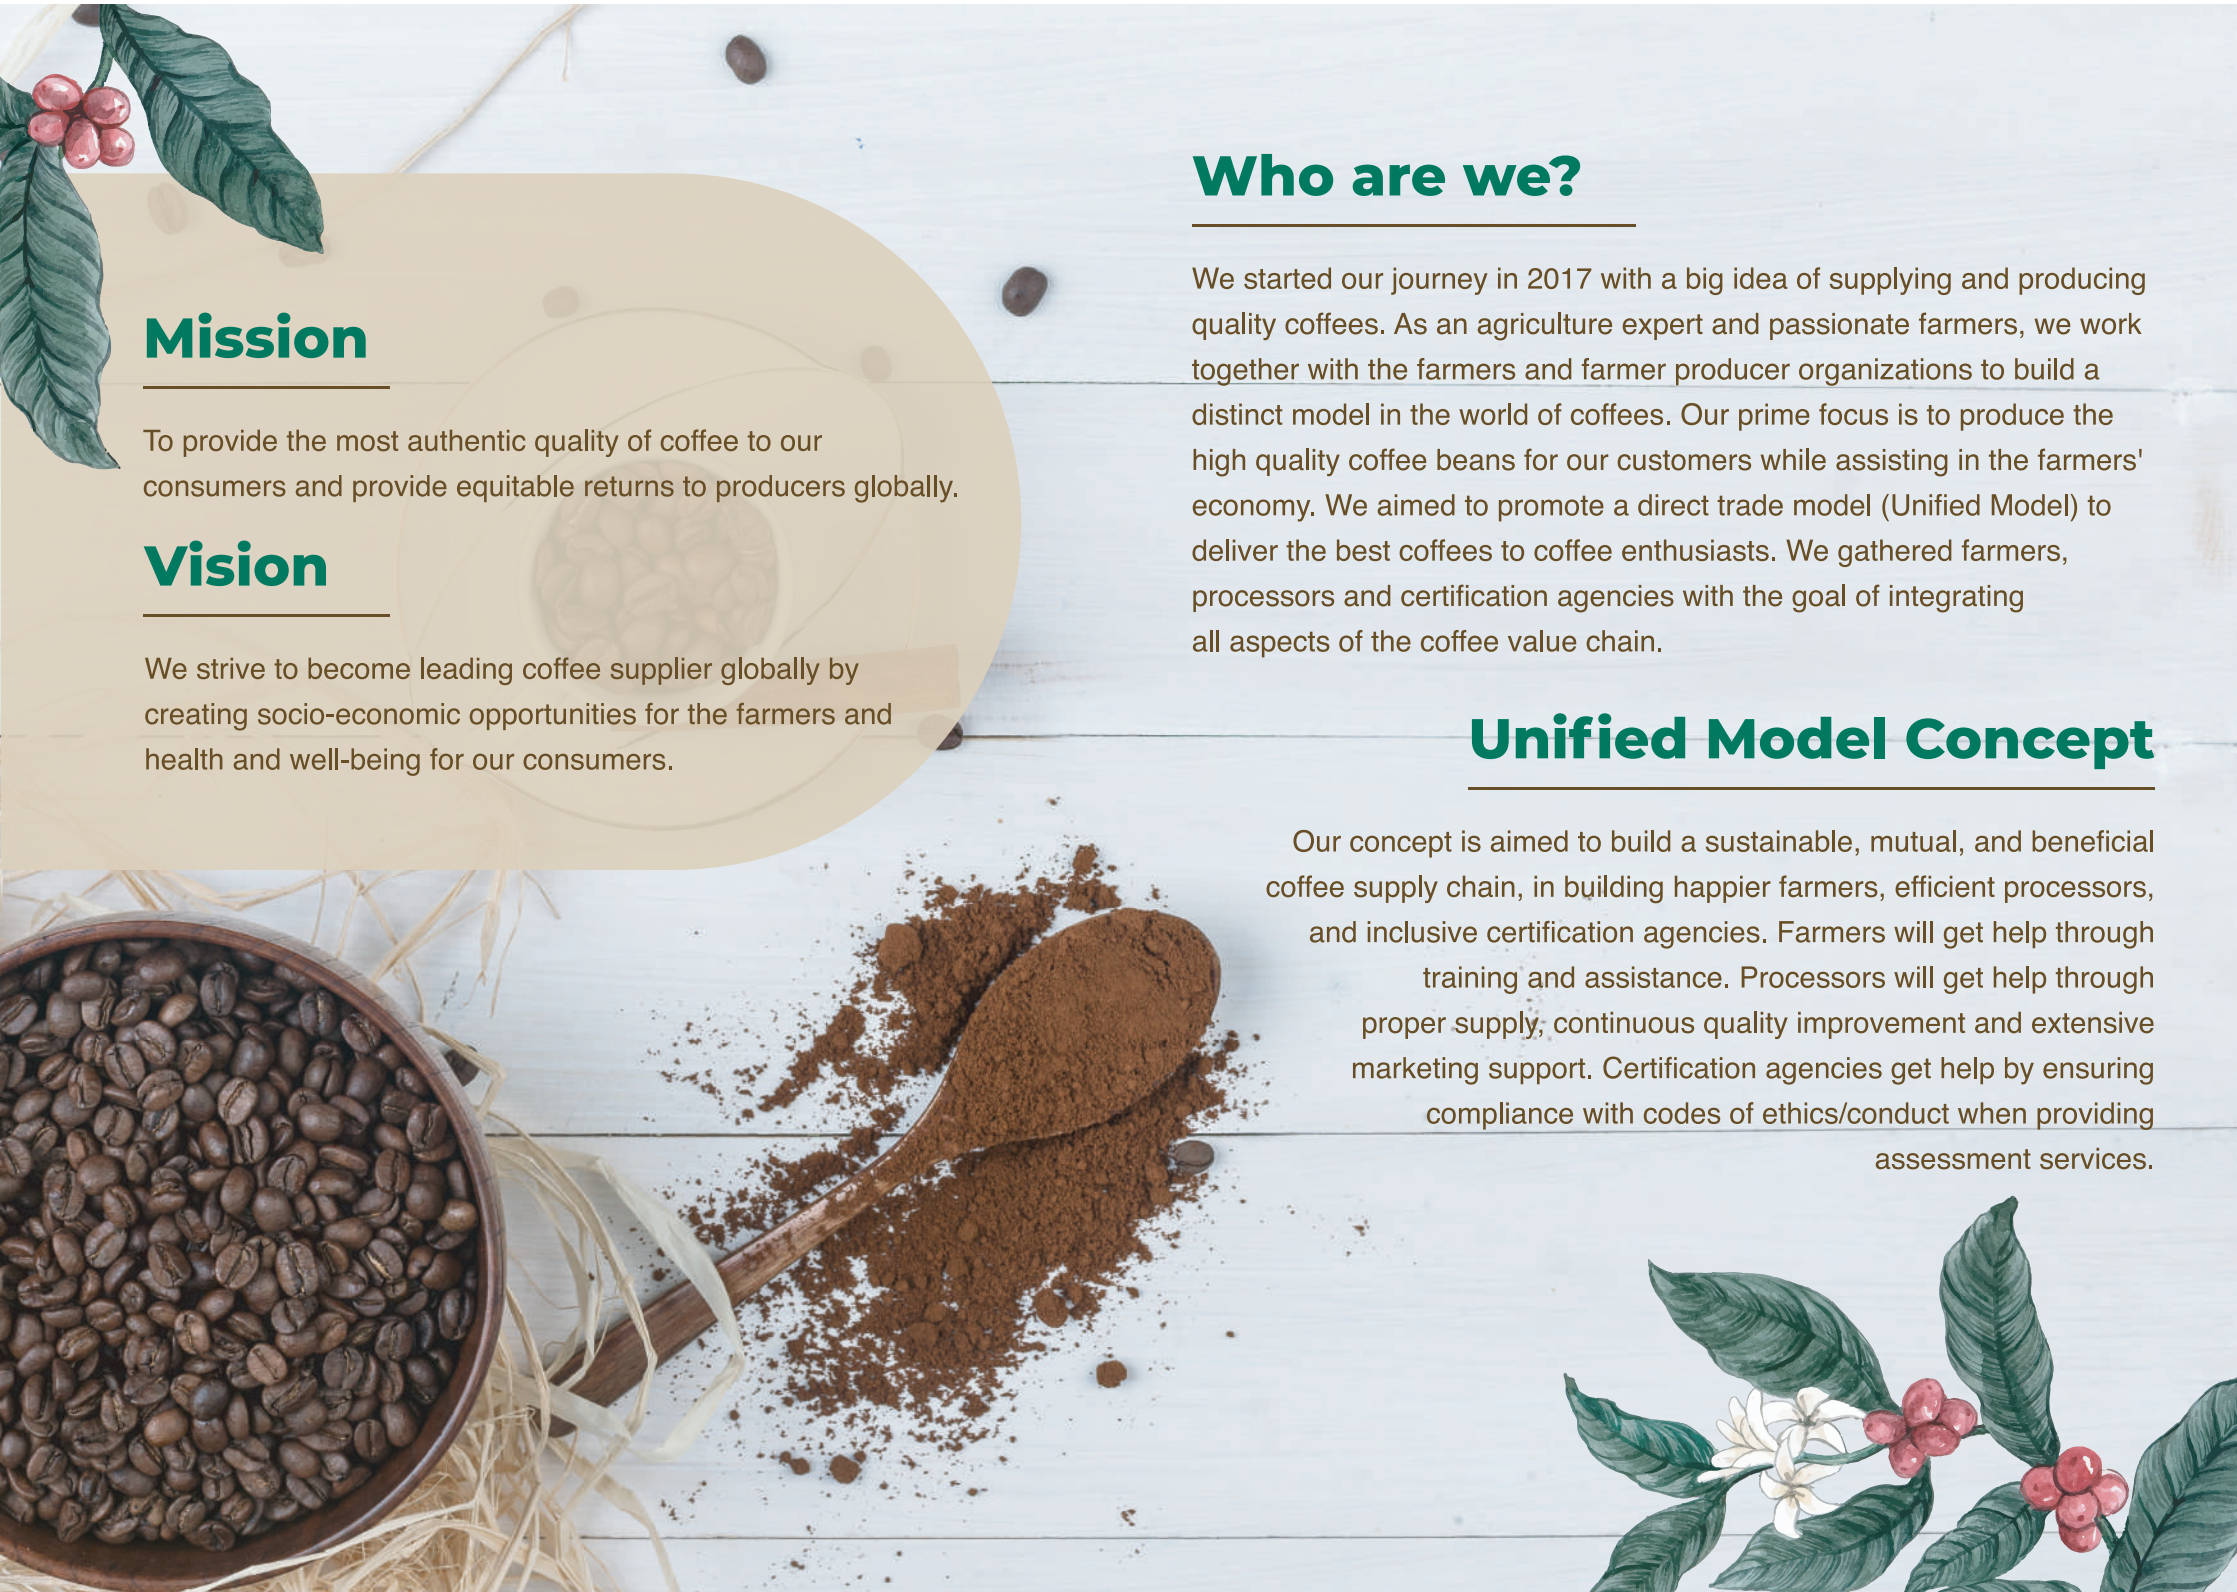

### Who are we?

We started our journey in 2017 with a big idea of supplying and producing quality coffees. As an agriculture expert and passionate farmers, we work together with the farmers and farmer producer organizations to build a distinct model in the world of coffees. Our prime focus is to produce the high quality coffee beans for our customers while assisting in the farmers' economy. We aimed to promote a direct trade model (Unified Model) to deliver the best coffees to coffee enthusiasts. We gathered farmers, processors and certification agencies with the goal of integrating all aspects of the coffee value chain.

### Unified Model Concept

Our concept is aimed to build a sustainable, mutual, and beneficial coffee supply chain, in building happier farmers, efficient processors, and inclusive certification agencies. Farmers will get help through training and assistance. Processors will get help through proper supply, continuous quality improvement and extensive marketing support. Certification agencies get help by ensuring compliance with codes of ethics/conduct when providing assessment services.

### What do we make?

The roasted and ground seeds of the tropical evergreen coffee plant used to make the beverage known as coffee. One of the three most consumed beverages worldwide is coffee. The specialty coffee market has been steadily expanding as more and more coffee drinkers like the distinctive flavours. We are focused on producing and supplying the consistent Indian coffee beans to you.

Araku, recognized for production of some of the best coffees in the world. and is rich in biodiversity and natural beauty. Araku coffee is renowned for its flavour, sweetness, aroma, and smoothness. It produces exquisite, flavored coffees with a distinctive flavour and rich taste.

Our GI tagged coffees include Araku Valley Arabica, Coorg Arabica, Bababudangiri Arabica, Chikmagalur Arabica & Wayanad Robusta coffees.

PRODUCT	Roasted Coffee Beans
ORIGIN	Araku : MSL 900 – 1000 m Coorg : MSL 1100-1200 m
VARIETY	Arabica, Robusta
PROCESSED	Graded and Bulk
PRODUCT DESCRIPTION	Roasted coffee beans have a pleasant scent and flavour. This may be ground and used in any filter coffee machine. <b>Arabica</b> : This coffee has dense notes of roasted nuts and dark fruit. It's rich and robust, yet it's also soft and easy on the palate. It's delicious on its own, but it also works well with a splash of milk & sweetener. <b>Robusta</b> : Robusta boasts a strong but harsh taste with a peanutty aftertaste. It is bitter and is mainly used in blends for espresso and also for instant coffee.
