

# Tinning Paints & Paste

 Kings Flux

High activity zinc chloride flux  
mixed with solder powder for  
general pre-tinning operations

RoHS and REACH compliant  
soldering with tin/silver, pure tin  
& low temperature tin/bismuth  
solder alloys

Available as free flowing paint and  
higher viscosity paste formulations

Low chloride, water free versions  
available for extended shelf life and  
more precise application

It is advised to remove zinc chloride  
residues after soldering
