

TATTOO AFTERCARE

Congratulations on your new tattoo! Following a good aftercare regimen is essential for the best healed results. Although rare, infection is possible. If you see signs of infection such as persistent increased redness or swelling, fever, drainage, or oozing, contact Karin at 772-200-4276 and your doctor immediately.

Days 1-3:

At Mojo Master Beauty Rehab, we choose to forego traditional bandaging and use Tegaderm, a medical grade dressing that acts as a second skin and seals your body's natural fluids and plasma to keep your tattoo healing. Tegaderm reduces healing time and keeps finer details of tattoos crisp. We typically recommend leaving your Tegaderm bandage on for 1-3 days in order to protect your tattoo from scabbing, infection and other irritants. You can shower, workout and continue everyday activities as usual.

Day 4:

- 🚩 Gently remove the Tegaderm dressing. It is sometimes easier to remove in the shower or under running water to help loosen the adhesive.
- 🚩 Gently wash the tattoo with a mild, fragrance free soap such as Dial, Cetaphil or Dove.
- 🚩 Pat Dry and allow to air dry 45 mins.
- 🚩 Once completely dry, apply a thin coat of the aftercare ointment (Tattoo Goo, After Inked or Aquaphor).
- 🚩 For the next 2 weeks, wash tattoo 2x daily and apply a thin coat of aftercare ointment.
- 🚩 Tattoos may take up to 6 weeks for the color to reach their maximum vibrancy. Keeping your tattoo well moisturized and protected from the sun will keep it look vibrant and fresh.
