

The Rail Clamp Company Quantum Superior *Plus* 14 Inch Disc Blade

The Rail Clamp Company Quantum Superior *Plus* 14 Inch Disc Blade is the next generation of abrasive wheel for cutting both standard and hardened rail sections.

In both bench tests and site trials The Rail Clamp Company Quantum Superior *Plus* 14 Inch Disc Blade managed 5 cuts straight through standard 113lb/UIC54 rail section before requiring the need for replacement. These test results were achieved with the blade fixed to a Husqvarna K1260 Rail Cutting Machine.

After just 2 cuts of 113lb flat bottom standard rail section the reduced wear to the Quantum Superior *Plus* 14 Inch Disc Blade is apparent. This picture depicts the difference in blade size after conducting 2 cuts on a customer's rail stillage. The machine operator was an experienced plant maintenance fitter working within the Network Rail supply chain.

Features and Benefits

- One 14 Inch Disc Blade can conduct up to 5 cuts straight through a 113lb rail section offering significant cost savings.
- Fast Cutting Speed (60 to 70 seconds)
- Perfect Straight Cut (less than 1% Horizontal and Vertical Deviation)
- Whilst conducting cutting of rail and pendling the cutting machine reduced vibration is experienced by the machine operator.
- Whilst cutting all grades of rail the amount of dust created from wear to the disc is greatly reduced. This mitigates against the risk of inhalation of dust by the machine operator.
- Vast reduction in wheel wear for extended product life. This offers less recyclable waste to the end user.

Weights and Dimensions of the Rail Clamp Company 14 Inch Superior Plus Rail Cutting Disc Blade

- Blade Diameter 14 Inch (356mm)
- Weight 0.9Kg
- 1 Inch (25.4mm) Centre Hole to fit Machine Arbor
- Thickness of Blade – 4mm
- Specification – Type 41, 356 x 4.0 x 25.4mm
- Max RPM 5500 (100 m/s)
- Part Number Norton Quantum 66252845406

Now available on istore: 0111/122244
