

Build Your Biotech Career with

Begin Biotech

Real Opportunities for Undergrads

1. Write Blogs for Begin Biotech

What is it?

Write short, informative, and engaging blogs on biotech topics that interest students or solve real problems.

What do you have to do?

- Choose a topic (you can also pick from suggested ones)
- Research and write 700–1000-word articles
- Get help with edits and formatting from our team

How it helps your CV:

- Shows writing, communication, and subject clarity
- Adds “Published Author - Begin Biotech” to your resume
- Builds a portfolio to show during interviews or SOPs

2. Create Biotech Content for Instagram

What is it?

Design simple, educational, or awareness-building biotech posts for social media.

What do you have to do?

- Choose a format (carousel, infographic, video, etc.)
- Research and design content
- Work with the Begin Biotech style guide

How it helps your CV:

- Shows digital literacy and communication skills
- Prepares you for roles in ed-tech, biotech marketing, or community building
- Adds visible public work to your profile

3. Co-author eBooks

What is it?

Work with the Begin Biotech team to research and write parts of an educational eBook for students.

What do you have to do?

- Join a 2–4 member writing group
- Work on a section or chapter
- Contribute ideas, edits, and final drafts

How it helps your CV:

- Co-authorship is a valuable academic and career credential
- Shows research and teamwork skills
- Impressive addition to SOPs or research-focused resumes

4. Design Study Resources

What is it?

Help make notes, revision sheets, or simple explainers for difficult biotech topics.

What do you have to do?

- Pick a topic or unit
- Summarize concepts into notes, diagrams, tables.
- Format for student readability

How it helps your CV:

- Demonstrates teaching and simplification skills
- Useful for academic, tutoring, or peer mentor roles
- Great for resumes targeting teaching assistant or education profiles

5. Host Online Events, Seminars, or Live Discussions

What is it?

Plan and lead small, engaging online sessions for the Begin Biotech community — including webinars, peer discussions, beginner-friendly seminars, or Q&A events.

What do you have to do?

- Pick a topic you're confident or curious about (we'll guide you)
- Prepare a short session plan or slide deck
- Host a live Google Meet session (20–40 minutes)
- Encourage questions and participation from attendees

How it helps your CV:

- Shows initiative, leadership, and communication skills
- Highlights event planning and community-building ability
- Adds “Event Host” or “Webinar Moderator—Begin Biotech” to your resume
- Great for SOPs, interviews, and roles that value speaking and outreach

6. Internships, Volunteering & More

What is it?

Get matched with biotech internships, projects, or volunteering opportunities shared by Begin Biotech.

What do you have to do?

- Apply through our website or join short projects
- Complete tasks or assist in events/content/operations

How it helps your CV:

- Hands-on experience = real impact
- Adds relevant roles/projects to your resume
- May lead to job offers, references, or future collaborations
