*Expert environmental risk advice across
the urban development lifecycle*

So you can focus on project delivery

Woodland Environmental

Proud affiliate and contributor

Who are we?

We partner with developers, architects, planners, engineers, contractors and project teams across Queensland from early planning through to construction and operation. Drawing on public and private development experience, Woodland Environmental is a trusted consultancy providing environmental planning, engineering and management services that help you navigate complex regulations whilst delivering practical, positive environmental and project outcomes and compliant operations, without unnecessary delays or budget blowouts.

Your practical and commercial partner through environmental compliance and sustainability

Alysha Woodland

Founder, Director and
Principal Environmental
Engineer

Qualifications: B. Env. Eng,
MEnvEng, CenvP

Alysha Woodland is a passionate leader and environmental engineer with over 20 years' experience. Known for her calm, collaborative approach, Alysha works alongside clients to navigate regulatory complexity and resolve challenges before they impact program or budget.

As a boutique consultancy, we provide direct access to senior expertise, responsive support and considered advice tailored to your project, without the large firm price tag.

Why work with us?

Woodland Environmental

We simplify environmental complexity so you can deliver and operate with confidence.

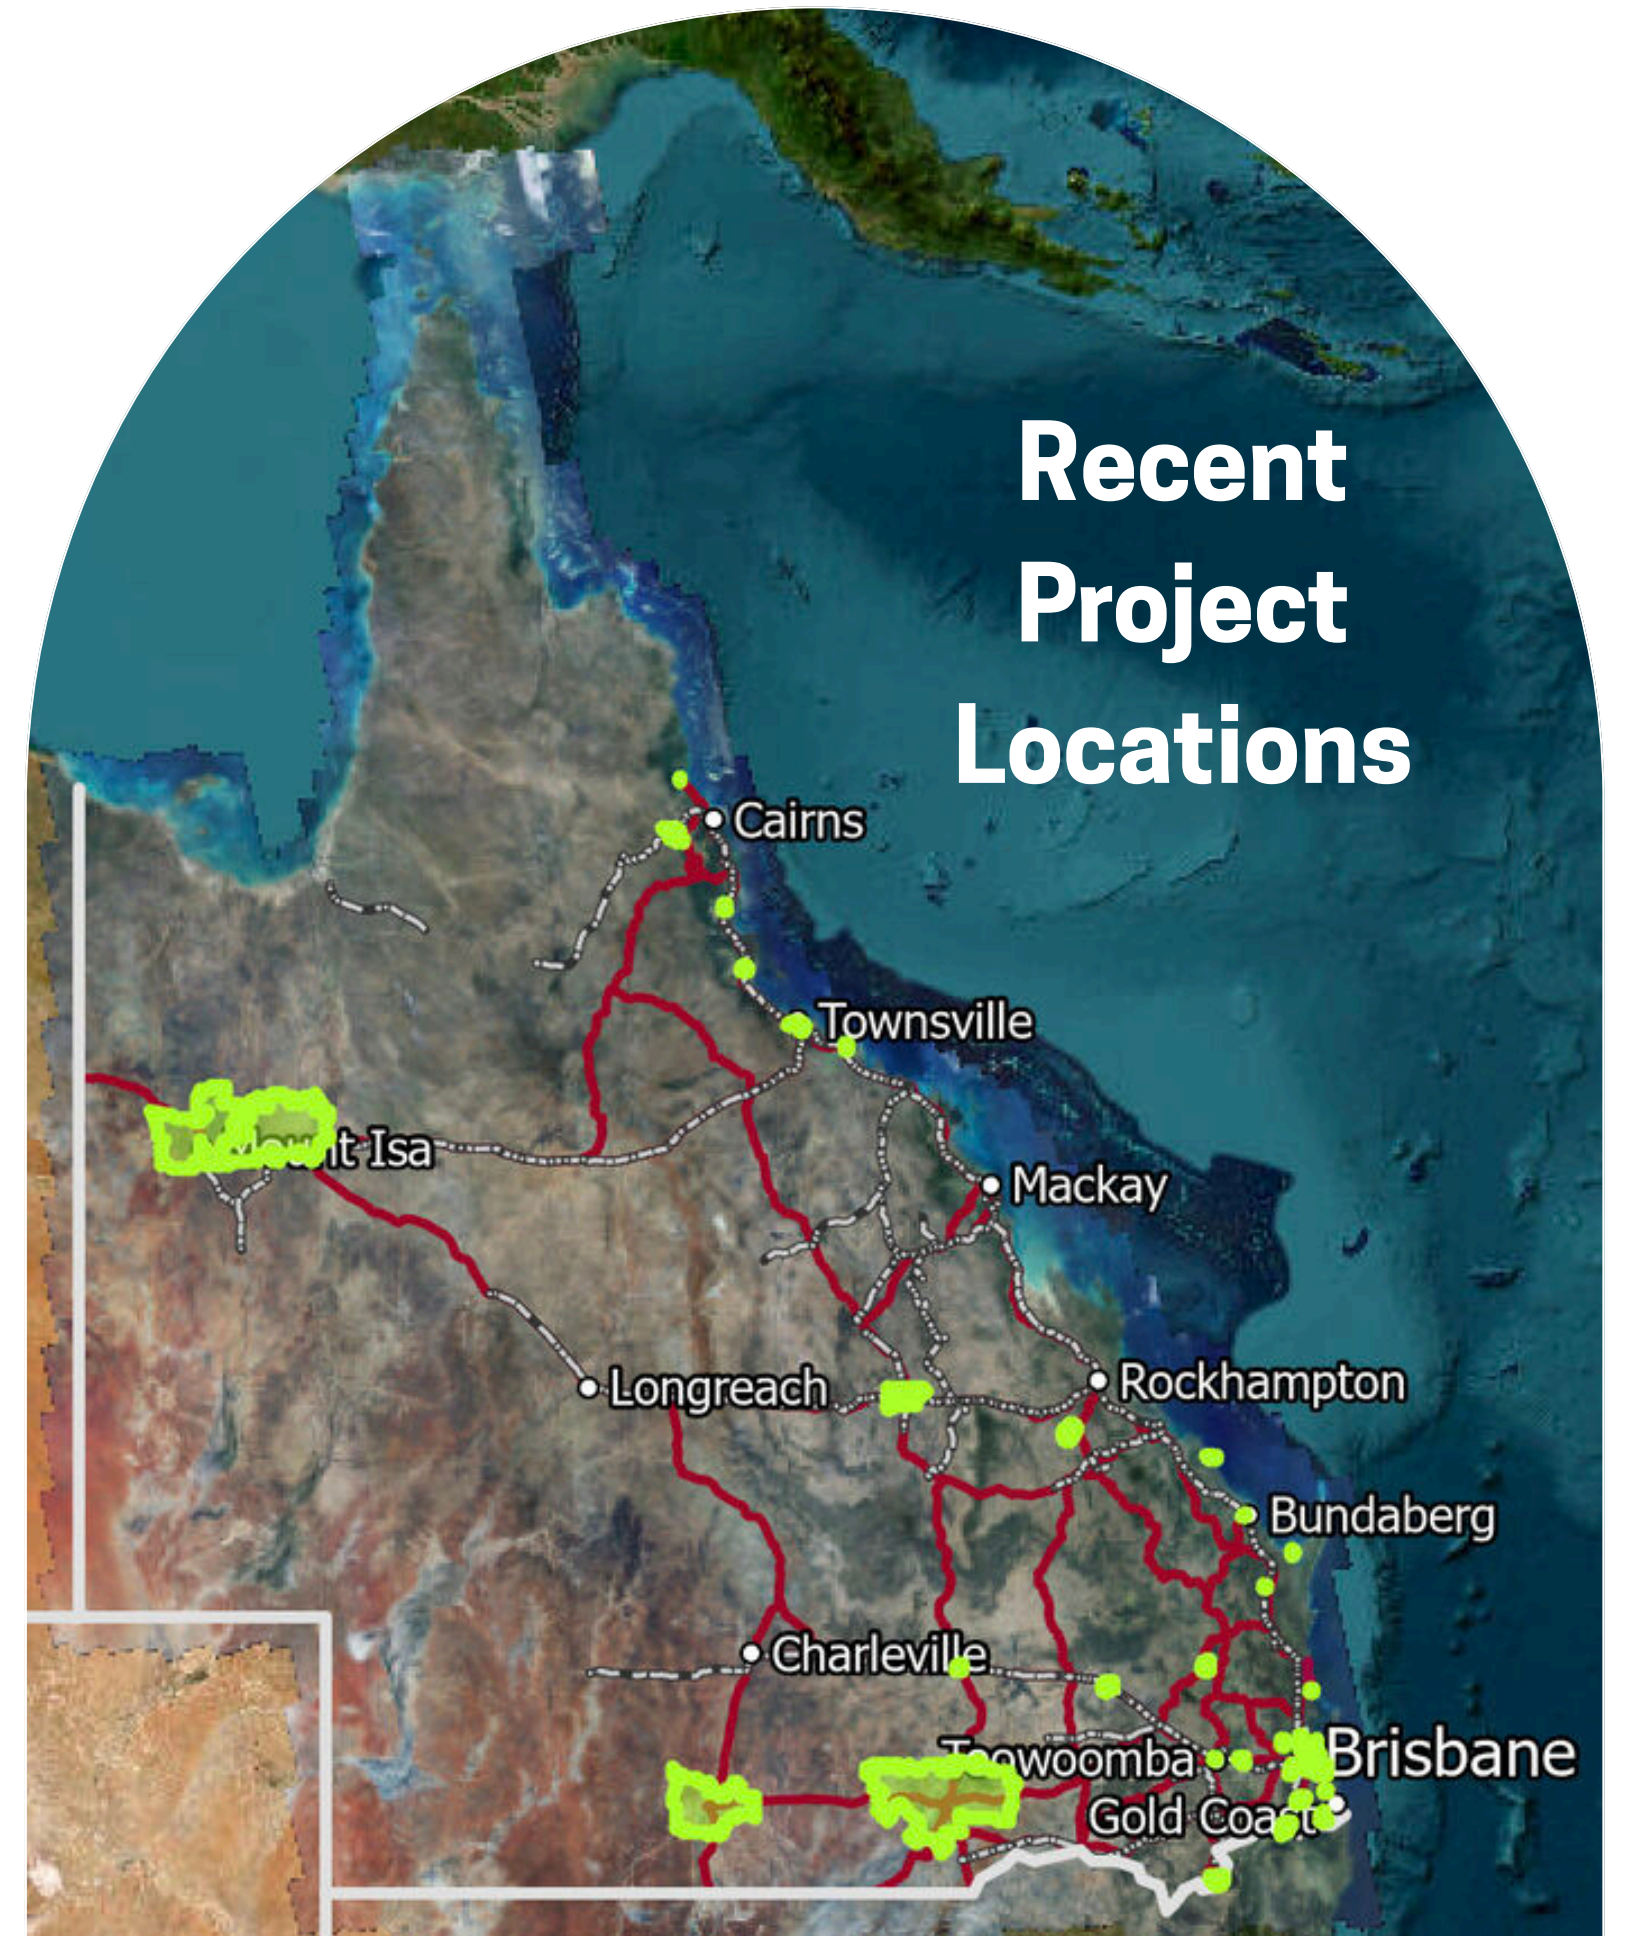

Company Vision

Support successful, sustainable projects by ensuring environmental compliance, reducing risks, and achieving positive environmental outcomes through deep regulatory understanding and proactive collaboration.

Company Mission

Deliver practical, project specific environmental advice, documentation, and training to our Clients throughout Queensland. Identify and manage environmental risks throughout project delivery and operation, backed by strong attention to detail and a proactive, collaborative approach.

Recent Project Locations

Partnering with you to provide practical, commercial environmental advice at every project stage and manage risks to project programs and budgets

Embedded support to safeguard your operations and reputation

Testimonials

Woodland Environmental has made a very valuable contribution to a number of PSC Design's projects, particularly in the Law and Order and Corrections sectors. The upfront due diligence assessments are instrumental in identifying issues early, and the team is proactive in providing timely advice on how best to manage these sometimes complex matters. Alysha Woodland's background in Government projects is likely unmatched in the industry and, on this basis alone, Woodland Environmental is highly recommended for this type of project delivery. **Brett Meters - Senior Associate, PSC Design**

Woodland Environmental has been an invaluable partner in delivering our projects across sensitive and often complex environments, including World Heritage parks. Alysha and her team are knowledgeable, responsive, and consistently go above and beyond to support our project needs. I highly recommend Woodland Environmental for their expertise and exceptional service. **Danny Neal - Manager, Capital Delivery Team, Asset Services, Queensland Parks and Wildlife Services, DETSI**

We regularly recommend Alysha to our clients because she is knowledgeable, responsive and solutions-focussed. She has successfully helped us to negotiate great outcomes on projects that have required ERA's or the management of complex environmental impacts. I can highly recommend her as part of any project team.

Michael Cattoni - Director, URBIS

Our Clients

Some of our recent, repeat architecture, town planning, civil construction and government clients:

You can trust us to identify and manage your environmental risks
