

Corporate Capability Brief

2020

About ReMilNet

- Targeted Focus on Efficiency and Effectiveness
 - Our Team leverage best practices and time saving technologies
 - Track record of cost savings and improved internal operations.
- Extensive Network of Experts
 - ReMilNet (Retired Military Network) has technical and programmatic experts to support customer requirements.
 - Majority of our personnel hold bachelors or higher degrees and many also have specific certifications within their fields of expertise.
- Proven Results
 - ReMilNet has supported hundreds of contracts and task orders.
 - Long standing partnerships with government and industry.

Core Competencies

■ Acquisition Management

- From BCAT I programs through localized customer developed solutions, ReMilNet supports the evaluation and design of new systems, through deployment and sustainment lifecycle.

■ C5ISR

- ReMilNet's extensive C5ISR support contributes to the design, training, implementation, and sustainment of new technologies across the globe.

■ Cybersecurity

- From evaluating new technologies to sustaining existing systems, ReMilNet has been providing cradle to grave cybersecurity support for more than 15 years.

■ Program Management

- ReMilNet's application of best practices help customers maximize limited resources, improve reporting, reduce risk, enhance communications, and increase performance.

Acquisition Management

- Program Management
 - ReMilNet evaluates requirements based on cost, schedule, performance, current system implications, and risk elements to recommend solutions that best meet customer demands.
- Technical Management
 - ReMilNet's experts design, configure, test, and evaluate new and upgraded systems across multiple data elements to improve system outputs and meet requirement objectives.
- Continuous Evaluation
 - ReMilNet applies best practices from Agile, CMMI, and Lean Six Sigma across all aspects of system analysis and evaluation to maximize results.
- Sustainment Support
 - ReMilNet supports repair and management of existing equipment, assists with implementing new technologies into existing platforms, and provides training and technical support to users across the globe.

C5ISR Support

■ System Design & Integration

- ReMilNet develops and drives the design, installation, and integration of new equipment to support customers missions.

■ System Training

- ReMilNet's system experts and trainers provide instruction to students in structured training environments and in the field, which enables end users to successfully operate and maintain systems in a variety of locations and conditions.

■ System Sustainment

- ReMilNet's staff of help desk, technical, logisticians, and cybersecurity professionals continuously monitor and support sustained systems across global operations.

■ System Analysis

- ReMilNet constantly evaluates performance of systems, cycles, and data to identify trends, isolates issues or potential causes for concern, and develops recommendations for improved performance.

Cybersecurity

■ Hardware & Software Support

- ReMilNet's staff utilize the Risk Management Framework to assess, harden, and mitigate risks across hardware and software applications.

■ Cybersecurity Plan Development

- ReMilNet develops and manages dozens of Cybersecurity plans and documents such as the POA&M, SSP, STIG, and Incident Response Plans, while providing input into ECP's and CM documents as new systems are integrated into customer programs.

■ Vulnerability and Verification Testing

- ReMilNet continuously tests and assists with the identification, prediction, and evaluation of vulnerabilities across a systems life cycle to mitigate risk to within acceptable levels.

■ ATO Obtainment

- ReMilNet's staff prepare necessary system documentation to obtain both Interim Approval to Test and Approval to Operate in compliance with federal and agency directives.

Program Management

- Operational Planning & Analysis
 - ReMilNet assists with strategic and operational planning, and develops strategic plans, maps, assessments, and analyses to maximize resources, improve reporting, increase performance, and reduce risk.
- Policy & Organizational Support
 - ReMilNet develops program policies, customer directives, mentoring and communication plans, and programmatic training packages to support new technologies and organizational changes over time.
- Financial Management & Internal Controls
 - ReMilNet's staff support all aspects of Financial Management to maintain and manage procurement, financial and audit readiness at department and command levels of an organization.
- Program Support
 - ReMilNet's qualified staff have backgrounds in a variety of disciplines, including program and technical management, logistics, finance, configuration management, engineering, cyber security, and more.

Success Stories

■ Oracle R12 Deployment Support

- ReMilNet's staff worked to meet R12 deployment and cutover phases to meet critical program milestones.

■ Cybersecurity Process Standardization

- ReMilNet conducted a review of existing Certification Process; recommended and developed templates that increased speed of completion, accuracy, and approval for system accreditations.

■ Life Cycle Sustainment Management

- Conducted analysis of fielded equipment issues, isolated root cause and recommended adjustment to end-user training which reduced failure rate reporting and reduced shipping costs 5% annually.

■ Spares Management

- ReMilNet refined and revised existing Equipment Replacement Program and improved accuracy of fielded spares by more than 20%.

■ SharePoint Workflow Development

- ReMilNet supported the development, implementation, and training of an online ordering system for over 500 fielded users and reduced overtime by 50%.

Success Stories Continued

■ New Program Establishment

- ReMilNet supported the stand up of a new Comptroller Department during the 18 month transition period to full operational capability.

■ Enterprise Data Collection and Reporting

- ReMilNet developed a methodology, processes, and templates to streamline reporting of 27 decentralized operation centers for improved data accuracy and analysis.

■ Manpower Sustainment

- ReMilNet created duties and responsibility handbooks for a department that were used to justify personnel requirements and as a result, did not lose any positions during a personnel reduction evaluation.

■ Audit Readiness

- ReMilNet documented more than 80 processes that covered all aspects of the organization which assisted the customer in passing an engineering audit.

Company Information

- Headquartered in Jacksonville, FL
 - Program Office in Stafford, VA
 - Staff supporting engagements in CA, FL, GA, NC, and VA
- Certifications
 - 8(m) Economically Disadvantaged Woman Owned Small Business (EDWOSB) (SBA Self Certified)
 - Woman Owned Small Business (SBA Self Certified)
 - 2016 Jacksonville Chamber Entrepreneurial Growth Division Small Business Leader of the Year
- Company Information
 - Cage Code: 3H1J2
 - DUNS 13-3151771
 - Sara Slettebo, President, sara@remilnet.com
