

Dreamchip Siddhi Digital School Bag Siddhi DSB S1

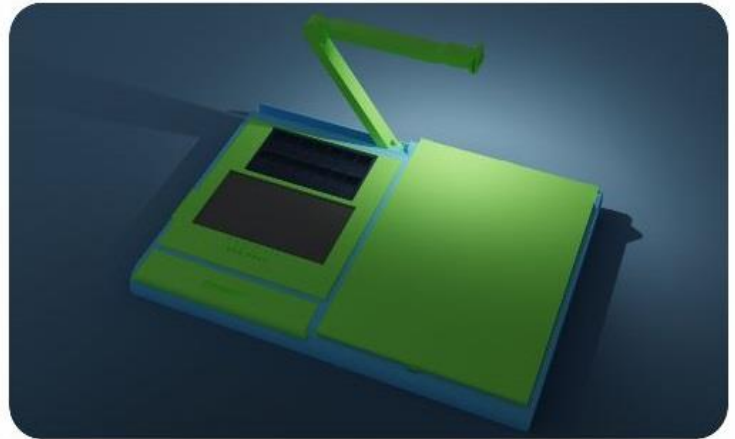

DreamChip
Electronics

Identifying “education” as an area of importance for the next generation, Dreamchip Electronics has set about design and development of Siddhi Digital School Bag (Siddhi DSB).

Unlike the typical heavy school bag, Siddhi DSB is compact and trendy. Siddhi DSB offers a digital module for storing text books, reference material and even content from previous/next level grades. With Siddhi DSB, children can access all relevant content in one place and learn at their pace.

For the child today, digital has become necessary but when a general-purpose tab or a smart phone is used for learning, games and other videos may distract or divert away the child’s attention. Siddhi DSB is designed and developed for learning only!

Besides the above, Siddhi DSB S1 includes, a lamp that allows study at night, a solar module to augment battery charge, a writing pad for taking down notes, a communication module that lets download of new content, a cute shelf for stationery items and a trendy strap for convenience.

If learning in English is easy for some, learning in mother tongue is easier for many, Siddhi offers content in the regional language – whether it is Sciences or just reading History, reading in a local language simplifies learning and even may eliminate the need to memorize by the rote method.

The abundant wealth of knowledge locked in many languages across the country has to be made available to everyone and Siddhi DSB makes it possible through the award winning SCCI SANSKRITI, a 16-bit phonetic code specification that enables “One Code For All Indian Languages”. Most Indian languages have common “Varnamala”, National anthem coded in one Indian language for instance can be displayed in another Indian language just by the tap of the screen, instantly, a feature unique to Siddhi and which makes Siddhi an ideal platform for learning school curriculum and beyond.

Besides Telugu, Siddhi DSB has initial support for ODIA Tamil and Devanagari scripts.

Siddhi DSB S1 comes pre-loaded with **Bharata Bala Siksha** (Telugu, Class V). Pricing starts at **Rs 14,995/-** including, a **4-year subscription to the online portal** and **taxes**. To order, Scan the code, make the payment online and send an email with payment transaction id to info@dreamchip.in (Order acceptance is subject to availability). **EMI option at Rs 400 per month for 48 months, inclusive of taxes.**

Siddhi DSB is designed, developed, and produced in India! #AatmanirbharBharat

Siddhi DSB, powered by Siddhi 32-bit Synthetic Processor & SoC. Currently realized on FPGA.
