"Nutmeg your friend, or foe." - Jerry Springfield

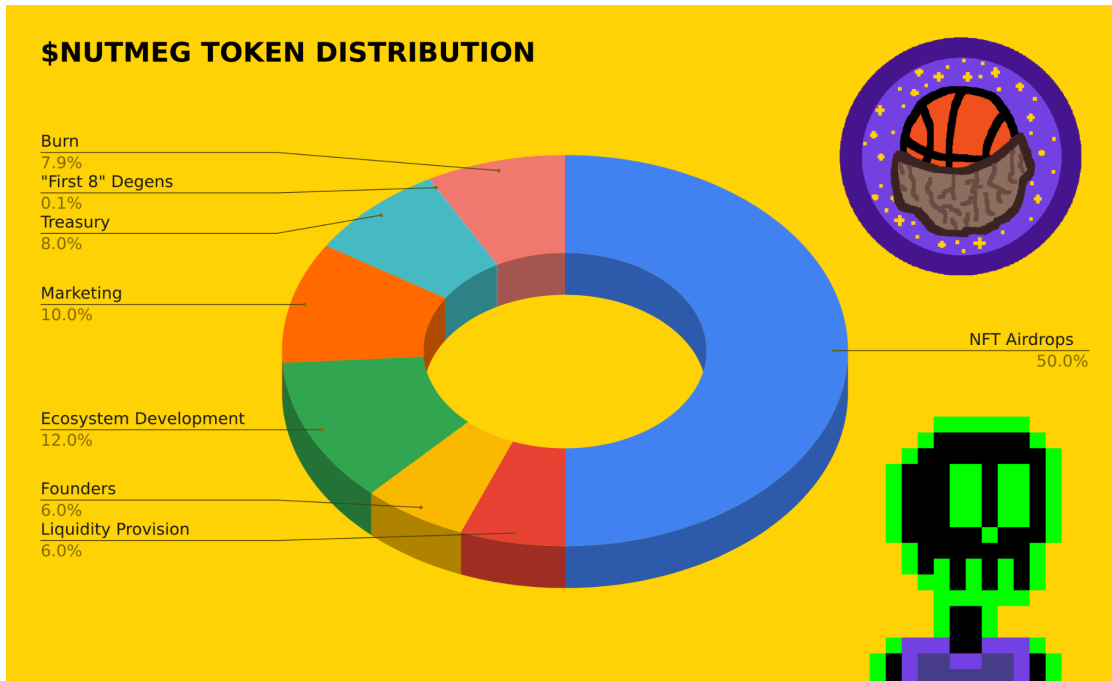

Nutmeg (\$NUTMEG) serves as an integral part of the Degen Hoopers Network, a fun NFT project that seamlessly blends the world of Basketball with the world of cryptocurrency. This project lives on the XPR Network (\$XPR, <https://xprnetwork.org/>). This project offers a diverse collection of 3,000 NFTs, distinguished by their rarity and unique aesthetics, all integrated within an ecosystem powered by the \$NUTMEG meme token on \$XPR. The total supply of \$NUTMEG is 6,969,696,969 tokens.

\$NUTMEG Tokenomics

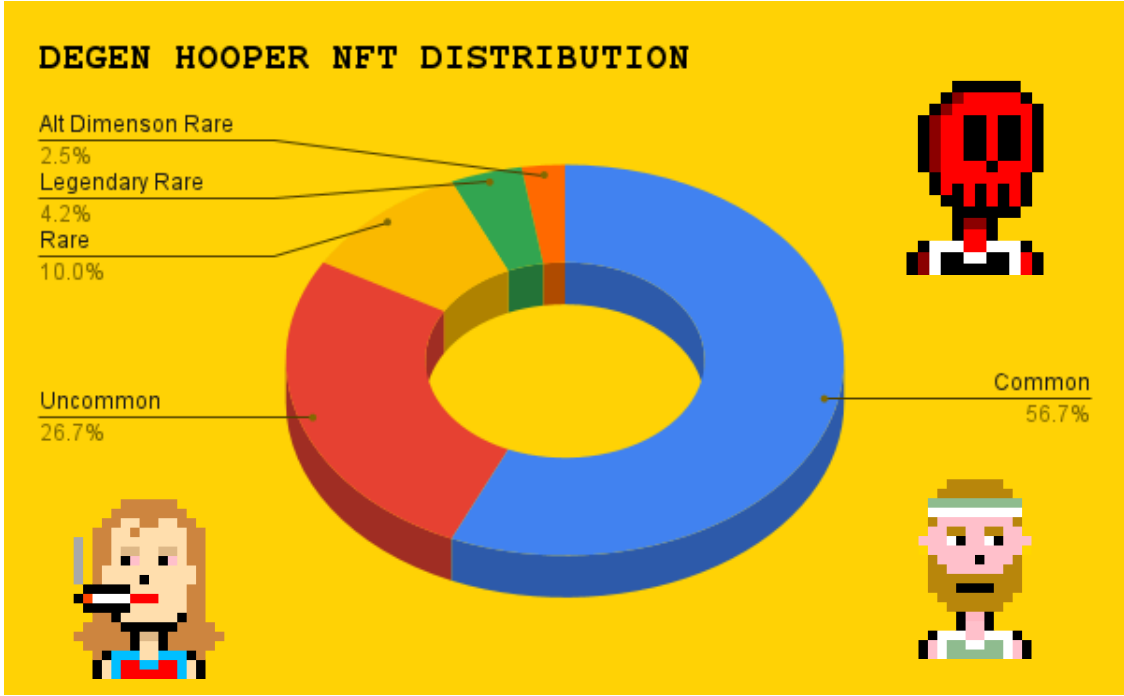

Part of the Degen Hoopers ecosystem lies the \$NUTMEG token, with a total supply of 6,969,696,969 coins. A significant 50% of this supply is allocated for distribution through monthly airdrops over four years, promoting community engagement and participation for Degen Hooper NFT holders. Our airdrop strategy involves a structured quarterly release of 170 NFTs (Q1 was 69), totaling 2,2619 NFTs over four years (mints every month, 3 per quarter, varied monthly mints with total 3 month/quarter mint = 170). With NFTs minted every month with \$NUTMEG airdrop The remaining 381 NFTs that make up the 3,000 Degen Hoopers are reserved for special occasions, providing flexibility within our ecosystem. The total supply of Degen Hooper NFTs is 3,000.

Tokenomics: Nutmeg tokenomics are carefully structured to foster community engagement, support liquidity, and ensure sustainable growth.

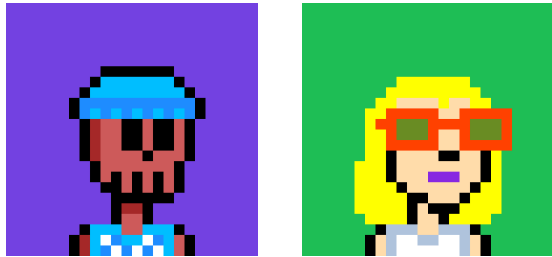

- **NFT Airdrops (50%):** A significant portion of the supply (3,484,848,484.5 coins) is allocated for monthly airdrops to DHN NFT holders. The allocation is distributed monthly, with a total of 170 NFTs released each quarter. (Each month, under its “quarter” there will be varied amounts minted per month but add up to/equal 170 NFTs per Quarter)
- **Liquidity Provision (6%):** A portion (418,181,818.14 coins) is dedicated to liquidity provision, enhancing market stability and facilitating trading activities.
- **Founders (6%):** The founders receive 6% (418,181,818.14 coins) to support project development and sustainability. 3% for 1st founder, if additional are added: 2% for second founder, 1% for the third founder.
- **Ecosystem Development (12%):** A significant portion (836,363,636.28 coins) is reserved for ecosystem development, including partnerships, integrations, and community initiatives.
- **Marketing (10%):** Marketing efforts are supported by 10% (696,969,696.9 coins) of the total supply to drive awareness and adoption of Nutmeg and DHN.
- **Treasury (8%):** The treasury receives 8% (557,575,757.52 coins) to manage operational expenses, fund future developments, and ensure long-term viability.
- **The “First 8” Degen Hoopers (0.069%):** Early buyers of the first 8 minted Degen Hoopers will split 8 ways to receive approximately 4,809,090.91 coins (601,136.364 each) to reward participation and early supporters.
- **Burning Mechanism (7.931%):** A burning mechanism is implemented, allocating 7.931% (552,766,666.61 coins) for regular token burns, reducing the circulating supply over time and increasing scarcity.

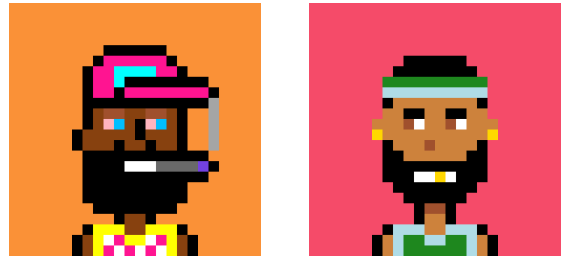

The Degen Hoopers Network

The network boasts an array of 3,000 NFTs, sorted into five tiers of rarity, each contributing uniquely to the ecosystem's vibrancy:

Common: 1,700 NFTs (56.67%)

Uncommon: 800 NFTs (26.67%)

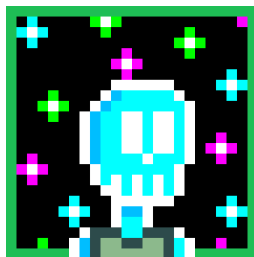

Rare: 300 NFTs (10%)

Legendary Rare: 125 NFTs (4.17%)

Alt Dimension Rare: 75 NFTs (2.5%)

Quarterly NFT Release and Rarity Allocation:

- Common: 96 NFTs
- Uncommon: 45 NFTs
- Rare: 17 NFTs
- Legendary Rare: 7 NFTs
- Alt Dimension Rare: 5 NFTs

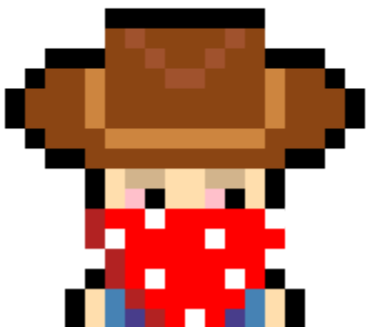

This structured release allows for a gradual expansion of the ecosystem, with the point system adapting to the evolving community.

Point System and Monthly Airdrop Distribution

Central to our distribution is the point system, where each NFT rarity is assigned a specific point value, influencing the monthly airdrop amount received by holders:

- Common: 1 point
- Uncommon: 2 points
- Rare: 4 points
- Legendary Rare: 6 points
- Alt Dimension Rare: 10 points

The monthly airdrop of 72,601,010.09 \$NUTMEG is distributed according to the total points within the community. Airdrop will happen at the 1st of each month (unless scheduled otherwise) and snapshot times TBA in the community before each airdrop. As new NFTs are introduced quarterly, the points-to-monthly allocation ratio of \$NUTMEG adjusts, reflecting the growing community engagement.

Dynamic Allocation Over Four Years

The allocation of \$NUTMEG per point is meticulously mapped over the four-year span, showcasing the dynamic nature of our tokenomics. \$NUTMEG is a meme and is to be actively used in the community to “nutmeg” someone or “Get Nutmeg’d”.

*meme coin not a security or any “utility” associated with \$NUTMEG

To provide a clearer view of the \$NUTMEG tokenomics and its implications for the Degen Hoopers ecosystem, we present an elaborate breakdown of \$NUTMEG per point allocations. This includes the monthly release of 170 NFTs, detailing the distribution across different rarity levels and how this impacts the monthly airdrop distribution.

Certainly, let's break it down comprehensively, including all months, quarters, and years, with the distribution of 170 NFTs quarterly and adjustments made for whole numbers:
