ART SQUARED

3-D PRINTING

We started off the camp week getting acquainted with all the 3-D printing technology, before students were challenged to design their own name tags and print objects of all shapes and sizes! Today we explored rotating objects and degree and have started thinking about our final projects. In fact, some plan to 3D print props for their movie projects!

- Sam & Katrina

DIGITAL MUSIC

In Digital Music, we've been teaching the campers how to use music software and create songs that build and get MORE exciting as they go on! Soon we're going to learn about special effects, and what they mean for music as opposed to other art forms - like plays and movies.

- Sam & Katrina

THEATREFIT

TheaterFIT is an original Highwood class blending theatre and fitness games for some high-energy fun! We start out every session with a warmup before jumping into a series of active games: including Winkam and Walk & Stop - challenging our quick-thinking skills - along with physical activities like Sharks & Minnows and Name Rush. Plus, campers had the chance to share their own theatre games they'd like to incorporate later in the week!
