ART SQUARED

3-D PRINTING

3-D printing has taken Highwood campers by storm! New campers have explored all the fundamentals of designing and printing simple objects like nametags, robots, and animals! Meanwhile, our returning campers have tested their problem solving skills through challenges like linking computers, constructing buildings, and creating complex objects. Each camper brings a new and unique element to 3-D printing, and I can't wait to see their creativity shine through their final projects.

- Katrina

DIGITAL MUSIC

Digital music is one area where kids are easily motivated to work freely and independently. They have endless ideas for their own songs and compositions and are learning programs like Garage Band quickly with ease. They are also excited about teaming up and working on projects together and swapping ideas.

THEATREFIT

TheatreFIT is an original Highwood class blending theatre and fitness games for some high-energy fun and artistic expression! Campers have had a blast jumping into a series of active games like Ghost King and Zookeeper's Keys - challenging our quick-thinking skills - and others like Sardines and Name Rush that have tested our physical endurance.

Catch Highwood at The Kennedy Center!

Mark your calendars: the time has come for Highwood's Page to Stage performance! Each year, Highwood students present a selection of songs and scenes from our upcoming season at The Kennedy Center. Admission is free and open to the general public - we hope to see you there!

FREE ADMISSION | Saturday, August 31 at 11 AM in the Concert Hall

1400 Spring Street, Suite 350, Downtown Silver Spring, MD 20910
