Why Attend Certification Prep Training?

To be proactive

You're a busy person, and new opportunities are there for the taking. Attending specialized training accelerates your preparation for certification exams. So take that exam sooner, get certified earlier, and then take on those new career challenges.

To be engaged

Classroom environments improve the overall learning experience, compared to passively watching on-demand videos of a talking head. When participants take active roles during group discussions and break-time chats, every attendee benefits.

To be focused

Prep courses cannot cover all in-scope material in certification exams. Instructors gauge their audience and adapt training sessions accordingly - spending more time on critical notions, on answering questions, and on what's really important.

The PostNom Difference

OFFICIALLY RECOGNIZED COURSE MATERIALS

We use textbooks and manuals officially recognized by the certification bodies. Because only those organizations know what's really in scope in their certification exams.

SUBJECT MATTER EXPERT INSTRUCTORS

Our instructors are experienced trainers and effective communicators. But it isn't just talk. They are also knowledgeable and expert practitioners.

EXERCISES AND QUIZZES TO REINFORCE NOTIONS

Knowledge is important, but passing that certification exam is critical. Participants will have the opportunity to develop their exam taking skills and test their knowledge.

REAL WORLD EXAMPLES

Experiences shared by instructors and participants help translate theoretical notions into practical examples. Making concepts easier to understand and remember.

What's Included

Context

Courses include group discussions covering certification requirements, exam preparation, and test taking tactics.

Environment

Publicly-held courses include lunches and refreshments, in order to promote attendee discussions. WiFi included where available.

Coaching

Each public session course attendee gets access to 60 minutes of online, one-on-one personalized coaching.

CISSP® Prep Course

This 5-day training session covers the eight (8) security domains that comprise the scope of the ISC2 Certified Information System Security Professional (CISSP) exam:

Domain 1 - Security and Risk Management

Domain 2 - Asset Security

Domain 3 - Security Architecture and Engineering

Domain 4 - Communication and Network Security

Domain 5 - Identity and Access Management (IAM)

Domain 6 - Security Assessment and Testing

Domain 7 - Security Operations

Domain 8 - Software Development Security

This course is based off the following textbook, through a licensing agreement:

- (ISC)2 CISSP: Certified Information Systems Security Professional Official Study Guide, 8th Edition, by Mike Chapple, James Michael Stewart, and Darril Gibson

Student materials include:

- A softcover printed copy of the textbook
- A softcover printed copy of the companion book (ISC)2 CISSP: Certified Information Systems Security Professional Official Practice Tests, 2nd Edition (contains 4 practice tests, plus 100 additional practice questions per domain)
- One year access to online study tools (a PDF comprehensive glossary, 700 electronic flashcards, and six 150-question bonus practice exams), through ownership of the Official Study Guide
- Bound printouts of presentation slides

CISSP certification exam costs are not included in the course fees.
