Description

- Insulation resistance measurement:
 - selectable measurement voltage in the 100...2500 V range with 100 V step,
 - continuous indication of insulation resistance or leakage current,
 - automatic discharge of capacitance of tested object after the insulation resistance measurement,
 - acoustic signalling of five-second periods to facilitate obtaining time characteristics,
 - measured test times T_1 , T_2 i T_3 to measure one or two absorption coefficients in 15, 60 and 600 s,
 - indication of actual test voltage during the measurement,
 - protection against measuring live objects,
 - two and three-lead measurement method,
- Continuity measurement of protective and equipotential conductors according to EN 61557-4
- with the >200 mA current.
- Leakage current measurement.
- Measurement of alternating and direct voltages in the 0...750 V range.
- Built-in rechargeable battery pack.
- The instruments meet the requirements of the EN 61557 standard.
- The ability to charge from car lighter (12 V) socket (additional

accessories).
