

CREEDX

CREEDX is a side project of CREED TRC20 on the tron and bsc networks.

CREEDX is a social crypto experiment. Meaning the project is designed to see the human reactions and interactions. Everyone participating in the project fully accepts their own risks. The idea of the concept is fully designed on creating a value by the community and in the end the developers will leave it as a free smartcontract with an organic supply on justswap.io and <https://justmoney.exchange/> When it is all released it will be a crypto asset and store of a value on tron network with no governance.

Creedx Trc20 Tokenomics

There will be 1 000 000 000 000 000 creedx created and will be distributed as follows:

40 000 000 000 000 will remain on the creation account to be burned by the team when all others are liquidated.

10 000 000 000 000 will be liquidated on justswap with 5 000 TRX setting 2B CREEDX for 1 TRX starting price

950 000 000 000 000 will be locked for in 19 seperate accounts

1 account holding 50T will be distributed to presalebuyers when all other 18 accounts are minted on justswap smartcontract..

With BEP20 500T supply on TRC20 will be burned as well.

Creedx Trc20 Presale

There will be 200 packs in total each worth 250B CREEDX, total 200 packs will be 50T CREEDX

Round 1

3 days limited to 5 packs per person

50 packs each 150 TRX will be sold to 3+ CFB Holders.

Round 2

3 days limited to 5 packs for one person

50 packs each 250 TRX will be sold to 0.1+ CFB holders

Round 3

14 days no limitation

100 packs each 250 CREED will be sold to anyone.

1 person can participate in all 3 rounds separately.

ON PRESALE NO ONE WILL RECEIVE ANY CREEDX. The amount of 50T CREEDX will only be distributed to presale participants when all other 18 wallets are minted in justswap contract. Unsold packs will also be burned and deducted from the total supply. Each pack will receive 250B CREEDX on distribution date.

Estimated launch day will be 1st September 2021. On condition that all packs are sold the team may decide on launching the justswap contract earlier.

How will the system work?

After finishing the presale the justswap contract will be created with 10T CREEDx/5000 TRX. Starting price will be 2B CREEDX= 1 TRX. Since there is no one holding CREEDX at the beginning, the price will start to climb and the team will start selling to justswap from 18 wallets. The amount of TRX gained will be distributed as follows:

-70% will be added to liquidity on justswap

-10% will be used by the team to cover the fees.

-20% will be added to BEAST POOL for their contribution to the creation phase.

FREE CREEDX PLAN

When all packs are sold, the main liquidation wallet will remove 50% of the liquidity. 100% of The CREEDX removed from justswap liquidity will be burned to lower the circulation to a much lower amount. 90% of The TRX removed from justswap liquidity will be used to buy CREEDX from liquidity to boost the price on justswap at once providing large gains on CREEDX holders and again the bought amount will be burned.

10% of the TRX will be shared between CFB holders and CREED TEAM. And the team will free the smartcontract to crypto space.

CREEDX Concept and Goals

The idea behind the project is to create value and free it from all governance issues. The team will not list the project on any exchange. The team's role in this project is to manage justswap liquidity and let it become people's own money. When this role is achieved there is two expected results:

- A token truly valued and governed by community like bitcoin.

- Create and add a true value on tron network to increase the exposure of the tron network

On condition that the final phase is not reached until 1st March 2022 the team will distribute the presale buyers share and burn the remaining CREEDX on any team accounts. In the worst scenario the CREEDX project will be free from governance in March 2022.

MONDAY BURNS

Every Monday the team will balance burned CREEDX equal to 30% of the real holder's amount aiming to reduce the total supply and make CREEDX more scarce.

Example:

30T CREEDX will be sent to the blackhole address if the real holder's total is 100T CREEDX. And when it increases to 200T the team will send another 30T CREEDX to the blackhole address.

Presale amounts will also be counted in the burn events.

The burns will happen on reflection on stated % on BEP20.

Any unsold amount will also be burned from team wallets in March 2022.

BEAST GUARD

1% of amounts reached at liquidity will be sent to BEAST GUARD and held until the end game play to be able to buy more CREEDX from justswap contract. The concept will enable funds to give extra boost to end game play.

CREEDX BEP20 ADDITION

On 25th October 2021 CREEDX BEP20 will be listed on pancake swap to increase exposure of the project. The listing on pancakeswap will be usdt/creedx to minimize the effect of market fluctuations and provide a more stabilized price balancing with tron network. Total supply will be counted as one on bought TRC20 and BEP20.

TOKENOMICS ON CREEDX BEP20

CREEDX will be supplied 500T and an equal amount will be burned from Tron network supply of 1 Quadrillion. 500T supply will be distributed as follows:

CREEDX will be liquidated on pancakeswap with \$0,000000005 price

150T will be locked for tron network swaps to Bep20

350T will be minted to pancakeswap.

CREEDX BEP20 PRINCIPLES

CREEDX contract on BEP20 will work as follows:

3% will be auto-burned

4% will be distributed to holders

3% will be distributed to Team

150T CREEDX will remain locked in case TRC20 users may seek cross-chain swaps until March 2022. any amount not swapped will be burned.

350T will be minted to pancake swap by the team and 50% of the income will be used to liquidate. Other 50% will be transferred to the Tron network and will be added on Creed Energy funds.

BEP20 holders will also be participating in the ROAD MADNESS event and their rewards will be paid in USDT equal to TRX reward. Pancake swap will also initiate the End Game Event in March 2022 at the same time as Justmoney and will be free from governance.

CROSSCHAIN SWAPS

Users may swap their assets between TRC20 and BEP20 1:1 rate on the value at the time of swap. Swaps between chains will play a major role in balancing both sides and both sides will eventually get

**balanced. The swap process will be enabled on 10th november 2022 to end game play on March 2022.
Then as CREEDX will be free from governance swapping will be disabled.**

CREED ENERGY PROGRAM FOR TRON NETWORK

Tron network requires TRX burn (as fee) or energy to perform transactions. Renting the energy saves upto 80% of the regular cost. Creed team will provide cheap energy to private users and projects to build an income and back up CREEDX. Renting costs may change due to network costs and market prices.

The energy is rentable with TRX directly paid to team members. Starting after March 2022 the energy program will be fully supporting CREEDX. On condition that the requirements are met, the Creed team may start it earlier.

a 20% discount will be applied on rentals with CREEDX.

20% of the TRX used rentals will be used to buy CREEDX from swaps and the amount bought will be burned.

Disclaimer

CREED TEAM holds no responsibility for loss of any kind of value for CREEDX users. Since crypto still has its own risks each and every participant in the project accepts to calculate their own risks.
