

VERVE RUST OIL

DESCRIPTION

These are soft film, solvent deposited, water displacing type, corrosion preventives. These fluids can be applied directly to water wet metal surfaces, where they displace water, leaving a protective film. All these fluids have excellent spreading and they can be applied either by dipping or by spraying.

APPLICATIONS

This grade offers a soft, tacky, oily film of good mechanical strength which can withstand subsequent handling. The product has wide application for protection of components with high degree of finish, in machine shops and heavy machinery and plant manufacture - e.g. tools, fasteners, strips, etc. It has excellent resistance to salt spray and hence can be applied on components to be freighted by sea.

PERFORMANCE STANDARDS

● IS:1154 passes

KEY PROPERTIES:-

CHARACTERISTICS	TYPICAL DATA
Coverage (sq.mt./ltr)	35-45
Specific gravity@30°C	0.83
Flash point °C	45
Protection -Indoors	9 Months
Outdoors	2 months
Film thickness (microns)	6.5-9
