

VERVE 5w30 Engine Oil

DESCRIPTION

Verve 5W-30 is the latest in lubricant technology. It contains unique Low Friction Technology developed by Verve's liquid engineers to improve the fuel economy of your vehicle. Verve 5W-30 will also ensure your engine stays in peak condition and is fully protected at all times, even at extended oil drain intervals

BENEFITS

User benefits include:

Fuel saving: Verve's Low Friction Technology provides fuel economy benefits when compared to a conventional 15W-40 engine oil. Further savings may be made by using Verve's premium transmission fluids.

Extended oil drain: Verve CJ 5W-30 has undergone extensive testing to ensure that it can be used at engine manufacturers' extended oil drain intervals. Excellent cold start and low temperature performance.

Protection: Verve CJ 5W-30 protects your engine from wear, even when soot and other contaminants are present. The tough molecules prevent engine wear and protect your engine against premature failures.

Efficient after-treatment systems. Verve CJ 5W-30 maintains the efficiency of exhaust after-treatment systems ensuring continued compliance with emissions legislation.

Reduced exhaust emissions: Verve CJ 5W-30 reduces the amount of CO₂ emitted from the exhaust due to reduced fuel usage and cleaner burn technology.

Applications

- Its primary application is for the latest low emission trucks, fitted with diesel particulate filters; it can also be used in older trucks and buses.

KEY PROPERTIES:-

Property	CJ
Grade	5W30
Density @ 15.6 C, kg/l, ASTM D4052	0.850
Flash Point	230
Kinematic Viscosity @ 100 C, mm ² /s, ASTM D445	12
Kinematic Viscosity @ 40 C, mm ² /s, ASTM D445	68
Pour Point, °C,	-42
Viscosity Index,	161
