

Countryside Watering Guide

Keep your plants healthy with these simple watering tips!

Check before you water:

☞ **Stick your finger 1-2 Inches Into the soil**

1. Dry? Water thoroughly
2. Moist? Wait and check again later or tomorrow
3. Soggy? Let It dry out before watering again

During heat waves: (90F+)

- Check plants morning and evening
- Plants may need water twice daily
- newly planted Items dry out faster

Best time to water:

☞ **Morning is best**

- ✓ Water early In the day when possible
- ✓ Avoid watering In the heat of the afternoon
- ✓ Evening watering is okay If plants are dry. Avoid leaving foliage wet overnight

Needs water:

- Wilting leaves
- Dry soil
- Drooping flowers
- lightweight container

Too much water:

- Yellowing leaves
- Mushy stems
- Soggy soil
- Wilting even though soil is wet

How to water correctly

- Water the soil, not just the leaves
- Water deeply (not just a quick spritz, then move on)
- For beds, soak the root zone
- Mulch helps soil stay moist longer
