

HEALING WIND THERAPY WAND PROTOCOLS

The Healing Wind Therapy Wand can be used for up to 30 minutes per day. Start with 10 minutes once per day, gradually adding time and/or multiple treatment sessions if desired.

Always start by drinking an 8 oz. glass of water charged for 30 seconds with the wand at warm or room temperature and finish with another 8oz. glass of charged, warm or room temperature water.

Set a timer for the total treatment time to begin. Use settings C, 1, or 2 and always be sure to be comfortable. It is easiest to perform sitting in a chair with some standing, if needed, or lying in bed.
