

Material Safety Data Sheet

Section 1: PRODUCT AND COMPANY INFORMATION

Product Name(s): Lafarge Cold Patch Asphalt

Product Identifiers: Lafarge Cold Patch Asphalt (Cold Patch Asphalt), Hot Mix Cold Lay Asphalt, Cold

Asphalt Paving Material, Cold Mix Asphaltic Concrete, Cold Mix Asphalt.

Manufacturer: Information Telephone Number:

Lafarge North America Inc. 703-480-3600 (9am to 5pm EST)

12018 Sunrise Valley Drive, Suite 500 **Emergency Telephone Number:** Reston, VA 20191 1-800-451-8346 (3E Hotline)

Product Use: Cold patch asphalt is used for repairing asphalt pavement, driveways, parking lots and

other surface, base, or sub-base pavement applications.

Note: This MSDS covers many types of cold patch asphalt. Individual composition of

hazardous constituents will vary between types of asphalt.

Section 2: COMPOSITION/INFORMATION ON INGREDIENTS

Component	Percent	CAS	OSHA PEL -TWA	ACGIH TLV-	LD ₅₀	LC ₅₀
Component	(By Weight)	Number	(mg/m ³)	TWA (mg/m ³)	(rat, oral)	
Aggregate	90-95	Various	NA	NA	NA	NA
Asphalt Cement (as Fume)	< 10	8052-42-4	NA	0.5	NA	NA
#2 Fuel Oil (as Vapor & Aerosol)	0-5	68476-30-2	2000	100 (I)	12g/kg	NA
Kerosene (as Vapor)	0-5	8008-20-6	NA	200	15g/kg	NA
Crystalline Silica	veries	14808-60-7	[(10) / (%SiO ₂ +2)] (R);	0.035 (D)	NA	NA
(as Quartz)	varies		[(30) / (%SiO ₂ +2)] (T)	0.025 (R)		

Note:

Cold patch asphalt is a mixture of gravel or rock, sand and asphalt cement. It may also contain small amounts of asphalt modifiers (e.g. anti-striping agents, hydrated lime), fly ash, slag, fibers (synthetic or organic), color pigment and other recycled material (e.g. ceramics, plastic, glass, etc.).

Section 3: HAZARD IDENTIFICATION

WARNING

Toxic - Harmful by inhalation. (Contains crystalline silica)

Irritant: Causes eye, skin and inhalation irritation

Use proper engineering controls, work practices, and personal protective equipment.

Read MSDS for details.

Emergency Overview:

Cold patch asphalt is a black colored granular solid that has a petroleum odor. Prolonged or repeated skin contact can cause drying of the skin which may produce irritation or dermatitis. If heated, hot product will cause severe thermal burns. When heated, this product may release toxic hydrogen sulfide (H₂S) vapors.

Page 1 of 6 Revised: 03/01/11

Section 3: HAZARD IDENTIFICATION (continued)

Potential Health Effects:

Eye Contact: Cutting, crushing or grinding hardened asphalt will release dust. Airborne dust may

cause immediate or delayed irritation or inflammation. Eye contact with cold patch asphalt can cause moderate eye irritation, redness, and itching. Eye exposures require immediate first aid to prevent damage to the eye. If heated, hot product will

cause severe thermal burns.

Skin Contact: Cold patch asphalt may cause dry skin, discomfort, irritation, and dermatitis.

Repeated contact may cause skin irritation from abrasion and asphalt cement. If

heated, hot product will cause severe thermal burns.

Inhalation (acute): Cutting, crushing or grinding hardened asphalt will release dust. Breathing dust may

cause nose, throat or lung irritation, including choking, depending on the degree of exposure. When heated, cold patch asphalt may release irritating fumes or vapors such as smoke, carbon dioxide, carbon monoxide, unburned hydrocarbons. Hydrogen sulfide and other sulfur-containing gases can evolve from this product at elevated temperatures. Exposure to fumes or vapors may cause irritation of the nose and throat, and symptoms such as headache, dizziness, loss of coordination,

and drowsiness.

Inhalation (chronic): Risk of injury depends on duration and level of exposure.

Silicosis: This product contains trace amounts of crystalline silica. Cutting, crushing or

grinding hardened asphalt or other crystalline silica-bearing materials will release respirable crystalline silica. Prolonged or repeated inhalation of respirable crystalline silica from this product can cause silicosis, a seriously disabling and fatal lung

disease.

Carcinogenicity: Cold patch asphalt is not listed as a carcinogen by IARC or NTP; however, cold

patch asphalt contains trace amounts of crystalline silica that is classified by IARC

and NTP as known human carcinogen.

Ingestion: Do not chew or ingest cold patch asphalt. Ingestion may result in nausea, vomiting,

diarrhea and restlessness. Chewing asphalt has caused gastrointestinal effects. Stomach obstructions have been reported in individuals who have chewed and

swallowed asphalt.

Medical Conditions

Individuals with preexisting skin conditions can be aggravated by exposure.

Aggravated by Exposure:

Section 4: FIRST AID MEASURES

Eye Contact: For contact with cold patch asphalt, rinse eyes thoroughly with water for at least 15

minutes. Seek medical attention. For contact with hot product, flush with large

amounts of water for at least 15 minutes. Immediately call a physician.

Skin Contact: Wash with cool water and a pH neutral soap or a mild skin detergent. Do not use

solvents or thinners to remove product from skin. Seek medical attention for rash,

irritation, and dermatitis.

For contact with hot product, immerse or flush skin with cold water for at least 15 minutes. Call a physician. Do not attempt to remove solidified product, since

removal may cause further tissue injury.

Page 2 of 6 Revised: 03/01/11

Section 4: FIRST AID MEASURES (continued)

Inhalation: Move person to fresh air. Seek medical attention for discomfort or if coughing or

other symptoms do not subside.

Ingestion: Do not induce vomiting. If conscious, have person drink plenty of water. Seek

medical attention or contact poison control center immediately.

Section 5: FIREFIGHTING MEASURES

Extinguishing Media:

Upper/Lower

Flashpoint & Method: NA Firefighting Equipment: A SCBA is recommended to

General Hazard: Combustible solid. limit exposures to combustion

Avoid breathing fumes. products when fighting any fire.

Use extinguishing media

appropriate for surrounding **Combustion Products:** Toxic gases produced in fire, such as CO, CO₂, and H₂S.

fire.

Auto-Ignition

Flammable Limit: NA Temperature: NA

Section 6: ACCIDENTAL RELEASE MEASURES

General: Use a shovel to scrape up product and place it into suitable containers for recovery

or disposal. Do not wash cold patch asphalt down sewage and drainage systems or into bodies of water (e.g. streams). Wear appropriate protective equipment as

described in Section 8.

Waste Disposal Method: Dispose of cold patch asphalt according to Federal, State, Provincial and Local

regulations.

Section 7: HANDLING AND STORAGE

General: Cold patch asphalt is heavy and poses risks such as sprains and strains to the

back, arms, shoulders and legs during lifting and mixing. Handle with care and use appropriate control measures. Do not stand on stockpiles of cold patch asphalt, they

may be unstable.

Usage: Cutting, crushing or grinding hardened asphalt or other crystalline silica-bearing

materials will release respirable crystalline silica. Use all appropriate measures of dust control or suppression, and Personal Protective Equipment (PPE) described in

Section 8 below.

Avoid contact with skin, eyes and clothing. Use additional precautions when handling hot product. Maintain employee exposure levels below established regulatory limits. Do not allow hot product to contact skin. Use all appropriate

Personal Protective Equipment (PPE) described in Section 8 below.

Storage: Store in properly closed containers that are appropriately labeled and in a cool well-

ventilated area. Do not expose to heat, open flames, strong oxidizers or other

source of ignition.

Storage Temperature: Store away from heat, all ignition sources and open flames.

Clothing: Remove and launder clothing that is soiled with asphalt. Thoroughly wash hands

and exposed skin after exposure to cold patch asphalt.

Page 3 of 6 Revised: 03/01/11

Section 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

Engineering Controls: Under ordinary conditions, engineering controls are not required. Use local exhaust

or general dilution ventilation when using at elevated temperatures or during

activities that generate fumes, to maintain levels below exposure limits.

Personal Protective Equipment (PPE):

Respiratory Under ordinary conditions no respiratory protection is required. Wear a NIOSH

Protection: approved respirator that is properly fitted and is in good condition when exposed to

dust or fumes above exposure limits.

Eye Protection: Wear ANSI approved glasses, safety goggles, or face shield when handling cold

patch asphalt to prevent contact with eyes.

Skin Protection: Wear leather or cloth work gloves to prevent skin contact and insulated gloves when

handling hot product. Thoroughly wash hands and other exposed skin after

exposure to cold patch asphalt.

Foot Protection: Wear ANSI approved hard-toed safety boots when handling cold patch asphalt.

Section 9: PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Granular solid. NA. **Evaporation Rate:** Appearance: Black solid. pH (in water): NA. Odor: **Boiling Point:** NA. Slight petroleum odor. **Vapor Pressure:** NA. **Freezing Point:** NA. Vapor Density: NA. Viscosity: NA. **Specific Gravity:** Insoluble NA. Solubility in Water:

Section 10: STABILITY AND REACTIVITY

Stability: Stable. Avoid contact with incompatible materials, excessive heat, sources of

ignition and open flame.

Incompatibility: Cold patch asphalt is incompatible with strong acids or bases, and oxidizing agents

such as nitrates, chlorates and peroxides.

Hazardous Polymerization: None.

Hazardous Decomposition: When heated may liberate hydrogen sulfide and various hydrocarbons.

Section 11 and 12: TOXICOLOGICAL AND ECOLOGICAL INFORMATION

For questions regarding toxicological and ecological information refer to contact information in Section 1.

Section 13: DISPOSAL CONSIDERATIONS

Dispose of waste and containers in compliance with applicable Federal, State, Provincial and Local regulations.

Section 14: TRANSPORT INFORMATION

This product is not classified as a Hazardous Material under U.S. DOT or Canadian TDG regulations.

Page 4 of 6 Revised: 03/01/11

Section 15: REGULATORY INFORMATION

OSHA/MSHA Hazard Communication:

This product is considered by OSHA/MSHA to be a hazardous chemical and should

be included in the employer's hazard communication program.

CERCLA/SUPERFUND:

This product is not listed as a CERCLA hazardous substance.

EPCRA SARA Title III:

This product has been reviewed according to the EPA Hazard Categories promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 and is considered to be an acute health hazard

(irritation).

EPRCA SARA Section 313:

This product contains none of the substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of

1986 and 40 CFR Part 372.

RCRA: If discarded in its purchased form, this product would not be a hazardous waste

either by listing or characteristic. However, under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product should be classified as a hazardous waste.

TSCA: This product and/or its components are listed on the Toxic Substances Control Act

(TSCA) inventory.

California Proposition

65:

Crystalline silica (airborne particulates of respirable size) is a substance known by

the State of California to cause cancer.

WHMIS/DSL:

Products containing crystalline silica are classified as D2A and are subject to

T)

◐

WHMIS requirements.
