## ENGINEERING SERVICES DIVISION

### *B-2 HEAT EXCHANGER DESIGN*

Our OEM-level engineering capabilities enable us to tackle projects others can't. AeroCore X is currently working with the United States Air Force to develop new heat exchangers for the B-2 program.

### *ADDITIVE MANUFACTURING*

The future of aerospace manufacturing is here! Our engineers designed the only part currently in use by the United States Air Force made via additive manufacturing. Contact us today about your application!
