Theories Communications Consultants is a Service-Disabled Veteran Minority Economically Disadvantaged Small Business founded in 2015 by people with 24 years of experience who have provided top-tier IT education and solutions to government agencies and organizations worldwide. We offer diverse online training options, including self-paced courses, instructor-led training, and an All-Access program. Our curriculum development is executed by seasoned IT professionals and educators to deliver comprehensive, up-to-date courses that meet industry standards. We also offer customized learning solutions tailored to meet our learners' and partners' unique needs and preferences.

Our Capabilities include:

- Work-from-Home-solutions: Secure remote access. Our solution allows you to access remote network enclaves through remote workspaces, providing restricted & DLP-enabled network and application layer access.

- Open-source intelligence (OSINT): Our OSINT solution allows you to execute all web interactivity in docker containers running in an Remote browser isolation (RBI) environment with only a seamless rendering user interface sent to the user's browser.

- Cybersecurity training: We offer courses on various cybersecurity topics, including cybersecurity fundamentals, network security, and ethical hacking.

- Cloud computing training: We offer courses on using cloud computing platforms, such as AWS, Azure, and Google Cloud Platform.

- Programming training: We offer courses on a variety of various programming languages, including Python, Java, and C++.

- Data science training: We offer courses on how to collect, analyze, and visualize data.

- Project management training: We offer courses on planning, managing, and executing projects.

- Secure remote desktop: Our Linux and Windows-based Enterprise Containerized Secure Remote Desktops provide browser-based access to a secure and customized work environment that allows your team to work from any location and device.

- Application streaming: Our solution hosts applications in a secure, isolated container and streams them to the user's browser as a rendering.

- Remote AI/ML/SW developer platforms: Our AI/ML/SW developer platforms provide Sand-boxed access to a secure and customized developer environment providing granular access control.

- Modeling, SIM, and Lab training workspaces: Our secure remote workspaces consist of joint Modeling, SIM, and Lab training that allow you to collaborate with your team on projects from anywhere in the world.

We believe that our solutions make us a valuable partner for government agencies and organizations looking to improve their IT workforce. We are committed to providing high-quality training and solutions to help our clients meet the challenges of the 21st century.
