

DIGITAL VIDEOTAPING

At Professional Sounds, we specialize in providing the latest digital video technology to ensure that you receive the finest digital video and sound possible. Our teams of experienced and talented videographers offer digital videotaping and photo montages for weddings, receptions, parties, and corporate events.

We understand that your special day is important and we will be there unobtrusively to capture every moment. Our full-time videographers are trained professionals with decades of experience in the field. We exclusively use broadcast-quality digital video camcorders and offer 4K and Blu-Ray digital recordings of your event. Before we start filming, we go through a video pre-planning checklist where you can pick exactly what you want us to capture. We offer a variety of packages with or without editing, and our package discounts can save you hundreds of dollars.

Once we have captured your event, our team of trained video engineers will spend hours editing your footage in our state-of-the-art production studios. We offer a range of final media types including high-quality flash drives for playback on any computer, Blu-Ray, or WeTransfer.

For your wedding ceremony, we will arrive an hour before the start and capture everything on your checklist including the receiving line and your departure. Your reception coverage may include your venue preview, table centerpieces, limousine arrival, bridal party introductions, toasts, prayer, your first dance, cake cutting, bouquet, garter, dollar dance, dash-for-cash, shoe game, anniversary dance, or anything else on your pre-planning video checklist.

If you would like to view samples from our digital videotaping department, please text us at 419-356-6000 or call one of our business offices at 419-385-6400 or 734-847-4747. Expect the best from Professional Sounds.
