RADIO AND TV COMMERCIAL PRODUCTION

Professional Sounds offers trained professionals with decades of experience in radio and television broadcasting to fit all of your radio and TV commercial, voice-over, and on-air talent production needs. We can provide a variety of vocal inflections from clean and crisp, to smooth and mellow, to hard sell and high energy.

Choose your vocal inflection, and then send us your script by e-mail and we will quote you a price and then record your project in our digital recording studios and return it to you over VoIP, or on a 3.0 flash drive. Doug Bermick has over 20 years of professional broadcast and on-air experience working for 92.5 and 105 FM in Toledo.

We also offer message programming for your message on hold telecommunication phone systems. If you would like commercial samples of our on-air talent or a price quote, text us at 419-356-6000, call 419-385-6400, or email: toledosbestdj@gmail.com. Expect the best voice-overs and on-air talent from Professional Sounds.
