

LOCKHEED MARTIN NGAD?

Last week Lockheed Martin (LM) teased a silhouette of a next generation fighter on Instagram. The news generated a lot of speculation. We believe that LM could have teased the shape of their **NGAD X-Plane** - it seems three X-Planes flew in the past years - as the dimensions point to an F-35 (shaded below) sized aircraft, much smaller than what it is thought will be the size of the USAF manned NGAD component.

NGAD CONCEPT

NGAD X-PLANE

LM NGAD aircraft size was calculated by comparing the canopy width with that of an F-35A
