

ABOUT US

Auspower Services is a trusted provider of Industrial Electrical and Earthing Solutions, committed to quality, safety, and reliability. We understand the demands of rural properties running livestock and cropping operations, and deliver tailored electrical solutions — from remote infrastructure to strategic asset management — that keep your property running.

OUR CAPABILITIES.

At Auspower Services, we specialise in delivering tailored electrical services for stations, livestock and cropping operations, including:

OVERHEAD AND UNDERGROUND

Reliable power reticulation across the property — from the homestead to remote pumps, yards and sheds.

- Pit and Pipe
- Overhead Poles and Cabling
- Cable Hauling
- Terminations and Testing

SWITCHBOARDS AND CONTROL PANELS

Supply and installation of modern, efficient and compliant switchboards and control panels for pump sheds, sheds and yards.

- Main Switchboard Upgrades
- Custom Switchboards
- Control Panels

EARTHING

Full in-house capability for all your earthing needs — critical for isolated rural supplies and generator-backed systems.

- Deep Drilling and Rock Drilling
- Hand Drilling and Driving
- Terminations and Testing
- Energy Queensland Approved Subcontractor

INSPECTIONS AND REPORTING

Scheduled inspections and clear reporting so you always know the condition of your electrical assets.

- Switchboard and Installation Inspections
- Thermal Imaging and Fault Detection
- RCD and Safety Switch Testing
- Condition Reports for Asset Planning

SUPPLY UPGRADES

Supply and installation of the infrastructure you need as irrigation, machinery and shed demands grow.

- Power Monitoring
- Demand Calculations and Network Applications
- Cabling and Switchboard Upgrades

LIGHTING

Supply and installation of energy-efficient lighting for yards, sheds and working areas — improving safety and cutting running costs.

- Area Lighting
- Shed and Yard Lighting

CONTROL SYSTEMS

In-house capability for installation, maintenance, breakdown and fault finding of pump, irrigation and automation control systems.

- Motor and Pump Control
- Automation
- Lighting Control Systems

ROUTINE MAINTENANCE

Planned maintenance programs that extend asset life and support strategic, property-wide asset management.

- Preventative Maintenance Programs
- Priority Callout for Breakdowns
- Asset Life-Cycle Planning
- Budgeting and Renewal Forecasting
