

We have had so many positive comments from our teachers about your presentation. Many of us are lacking in the area of dance and rhythmic movement. You were able to help us overcome our inhibitions and help us to see that it is possible for anyone to try and incorporate dance into our programs. Your presentation was not only fun but invigorating too. You were able to motivate and empower us to try out your ideas with our students.

- P. Mills, Clark County School District, Nevada

Just a note to inform you that I fell in professional love with you during the P.E.L.T. Conference in North Carolina. Your spirally developed teaching style renews my hope in the goals of education. Please continue to touch teachers and dancers via your rhythmical movement vehicle. Because of you I have new insight in regard to the attraction of males to the world of dance. We need you!

- B. Ambrosia, Physical Education Instructor, North Carolina

As a studio teacher, I really appreciate all the information regarding principles, planning, positive reinforcement, and cooperative teaching. Very few pro dancers turned teachers know those basics for teaching

- Participant, Southwest Dance Workshop, California
