

# Quick JUMBO BLOCK® Facts – not fairy tales

## 1 The Hardware of Resilience

**Massive** ✓ 5 tons of heavy-duty concrete per module.

**Strong** ✓ 25 cm wall thickness for maximum structural integrity.

**Spacious** ✓ ~16 m³ gross / ~14 m³ net capacity per block.

**Hollow Design** ✓ Fully accessible internal structure.

## 2 The Uniqueness

**100% Reversible** ✓ Relocate or remove instead of demolish – even years after installation.

**Unlimited Scaling** ✓ From small cisterns to massive industrial retention basins.

**Full Service Access** ✓ Drive-in capability for machinery via integrated ramps.

**Low Maintenance** ✓ No clogging like in small-scale pipe systems; easy mechanical cleaning.

## 3 The Intelligence

**Real-Time Monitoring** ✓ **Digital** tracking of water levels.

**Smart Safety** ✓ Integrated early-warning system for extreme weather (Demo via [jumboblock.net](http://jumboblock.net)).

**Multifunctional** ✓ Storage, infiltration, cooling & flood protection.

## 4 Visit us on-site! ✓

Nothing compares to seeing the sheer scale of a JUMBO BLOCK® live.

**Location:** JUMBO BLOCK® Site, Weißensee (Thuringia, Germany)

**Experience:** The massive JUMBO BLOCK® module, sealing and coating, and intelligent monitoring technology as a practical example.

**We look forward to welcoming you at the JUMBO BLOCK® in Weißensee!**
