Classroom models that make it easy to teach and easy to learn!

OSALO's original "Natural Expression Input Display" and "Natural Expression Output Display" make it possible to display fractions, exponents, logarithms, powers, and square roots just as they are written in the textbook. The result is enhanced student comprehension and improved math class efficiency.

Natural input

Input expressions and arithmetic operations as they appear in written form.

Natural output

Calculation results appear in the same format as they are written.

Full-do display

Equations and statistical data are displayed in a clear, easy-to-read format.

OSALO BRAND STORY

Long long ago there was a little boy who is called Mr. Ewong . He was dream to be a swordsman when hewas a child. However, He change his dream since he has a poor math. Mr. Ewong was a perfectionist since he was a child, but in learning, mathematics was very poor, He was upset of the results in every examinations . Every time he do a math job, he need the assistance of a finger or a small toothpick to help. One day he walked down the street and saw that the owner of a store was calculating the price with the abacus, which was complicated, and the owner of another store was using the calculator to calculate the price for the guest. It was very quick and accurate. In the 1990s, calculators were not popularized in every household. Mr. Ewong thought that if a calculator could be popularized, the calculation would be simpler. With the dream of "making calculations simpler", He have created a calculator brand and regard as a lifelong mission. This is OSALO!
