

Resolution Protecting and Strengthening Children and Families in Colorado:

Whereas, it is a fundamental responsibility of civil government to protect and strengthen the primary building block of society called the family, and

Whereas, there are currently forces at work in the super-majority Democrat Party presently controlling Colorado state government and public schools to reframe the traditional definitions of boys and girls, and

Whereas, these traditional definitions are based on biologically distinct and scientifically proven physiological differences, and

Whereas, the stated basis of these actions by the Democrat Party derive from an extremely rare medical condition historically known until 2013 as "gender dysphoria", and

Whereas, thousands of children each year in the United State with no history of gender dysphoria are now presenting at gender clinics, with numbers rising each year, and

Whereas, studies show that between 80 and 90 percent of young people will outgrow their transgender feelings by the time they're an adult if not falsely indoctrinated by others as to their true biological gender, and

Whereas, a child who undergoes gender reassignment surgery results in lifelong dependency on drug and medical care, and are more likely than their cisgender peers to have concurrent mental health and neurodiverse conditions, disorders and including depression, anxiety, attention deficit disorders and autism.

Whereas, 21 states have passed "**Help Not Harm**" themed-legislation, protecting the rights of parents in having sole discretion over decisions affecting the health and well-being socially, physically and psychologically of their children, and

Therefore, be it resolved that the Republican Party of Colorado strongly and unreservedly supports all social, legislative and constitutional actions that preserve and protect the rights of parents, and

Be it resolved, that the Republican Party of Colorado strongly and unreservedly supports all social and legislative actions resulting in disallowing minor biological boys from competing in girls' sports in the public schools of Colorado, and

Be it resolved, that a healthcare provider may not perform or abet any medical procedure administered to or performed on minors when the purpose of the medical procedure enables a minor to identify with, or live as, a purported identity inconsistent with the minor's sex or treat purported discomfort or distress from a discordance between the minor's sex and asserted identity, or to provide drugs to accomplish such result.
