Vulnerability Management & ACAS/HBSS

Our Vulnerability Management and ACAS/HBSS services proactively identify, assess, and remediate security weaknesses across your IT infrastructure. We use the Assured Compliance Assessment Solution (ACAS) and Host-Based Security System (HBSS) tools to deliver continuous vulnerability detection and reporting in compliance with DoD and federal standards.

Key Capabilities:

- ACAS/Nessus scanner deployment, configuration, and management
- Automated vulnerability scans with custom scan policies and schedules
- HBSS (McAfee/Trellix ePO) setup, tuning, and policy enforcement
- Integration with SIEM and incident response workflows
- Compliance reporting aligned to RMF, FISMA, and STIG requirements
- Risk scoring, remediation tracking, and POA&M support
