We are excited to announce that over the past year, we have completed the requirements of becoming an affiliated laboratory of Dairy One and National Forage Testing Association (NFTA) certified. Our affiliation with Dairy One is the only affiliation in the Pacific Northwest and only one of five affiliated laboratories nationwide. At the request of Dairy One, we are eager to provide our clients with the newest technology in NIR testing, as we have purchased the FOSS 2500F model. This will allow us to provide our clients with expedited results and reporting while insuring the most accurate testing available by NIR standards using the calculations provided by the industry leader, Dairy One. In using Dairy One equations, our reports reflect the years of expertise from dedicated chemists, providing detailed, all-inclusive reports. We have also purchased a Flow Injection Analyzer instrument, ensuring our clients the most accurate results in the field of Nitrate testing. Flow injection testing automates traditional wet-chemistry methods, thus reducing possibilities of human error to provide repeatable and reliable results. For testing minerals, we have acquired an Inductively Coupled Plasma-Optical Emission Spectrometer (ICP-OES) instrument to analyze minerals in forage. For the purposes of providing reliable and repeatable results, we have purchased the industry's most current instrumentation to suit the needs of all forage samples. All of this has been done to ensure that Ag Test, LLC will provide our clients with the best possible customer service in the forage testing industry.

NIR Forage Costs

NIR (alfalfa, grass hay, haylage, corn silage, total mixed rations, straw) Including: <i>(%DM, %CP, %ADF, %NDF, RFV, %Lignin, %TDN, %NFC, %Starch, %WSC, %ESC, %CF, %Ash, %TDN) (Calcium, Phosphorus, Magnesium, Potassium, Sulfur, Chloride) (RFQ, Milk Kg/Metric Ton DM, Horse DE, Mcal/Kg)</i>	\$26.00
Nitrates Only	\$15.00
Nitrates <i>(Included with NIR package)</i>	\$9.00
Genetically Modified Organism (GMO @ 5%)	\$15.00
GMO @ 5% <i>(Included with NIR package)</i>	\$9.00
