

Where does the sun live?

Where does the sun live? where does he stay?

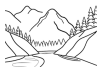

Where does the sun live at the end of the day?

Where does the sun live? where does he hide?

Where does the sun live in the dead of the night?

Could it be far beyond that stretch of grass?

Or down behind the mountain pass?

Could it be under the sea as we gaze from land?

Oh! The Lord He takes him into His hands...

At the end of the day.

Where does the moon live? where does she stay?

Where does the moon live at the end of the day?

Where does the moon live? where does she hide?

Where does the moon live at the end of the night?

(Chorus, then 'Ooh')
