

“RETIREMENT PLANNING & 401K PROTECTION AWARENESS MONTH”

Whether you're the age of 18 or 68 Retirement Planning should be a priority. One day you will no longer be able to or want to work. As such your quality of life, when you do retire, will depend on how well you planned and prepared for it.

Most employees have employer sponsored 401K savings plans designed to assist for retirement. However, most employees are not exactly sure how they work or how your money is performing, if it's protected or if it will be enough for retirement. Additionally, when an employee leaves that company they may not know what to do with their 401K, as such many make a terrible mistake which could cause them tax liabilities and penalties.

There are many other products & services that can help ensure you are on the right track to achieve your retirement goal. The first step is to get EDUCATED on which products & services fit you best towards your goals and dreams. By doing so you will be EMPOWERED & EQUIPPED to achieve your goals and dreams well into retirement.

The Ambassadors 4HOPE has over 20 years of experience in the Financial Services Industry. As such, we take pride in ensuring our

clients know how to grow and protect the assets they've worked so hard over the years to build and accumulate.

We have dedicated November as, "Retirement Planning & 401K Protection Awareness Month".

If you want to get educated about your Future Financial Success, Please contact us for a consultation.
