

# QUARTZ VS GRANITE

## QUARTZ

Manufactured from natural quartz aggregates and resin

Nearly indestructible, scratch and stain-resistant. Heat may damage quartz countertops.

Consistent, streamlined, and uniform looking. Options range from pure colors to imitations of natural stone.

No sealing required. Maintenance includes daily use of soap and water.

For people who prefer simple, streamlined look.

Suitable for indoor installations

## GRANITE

100% Natural stone

Interlocking structure gives granite a tremendously durable quality. Scratch and stain resistant when sealed properly and regularly.

Each slab is unique, with an endless number of patterns, colors, and hues.

Require sealing on a regular basis and daily cleaning with soap and water.

For those who seek unique appearance and natural look.

Suitable for indoor and outdoor installations
