

**Maximize Safety, Minimize Risks.**

# EXPERIENCE THE TOOLBOX YOUR EHS GAME-CHANGER!

## The Toolbox - Environment, Health, & Safety Software for the Golf and Sports Turf Industry

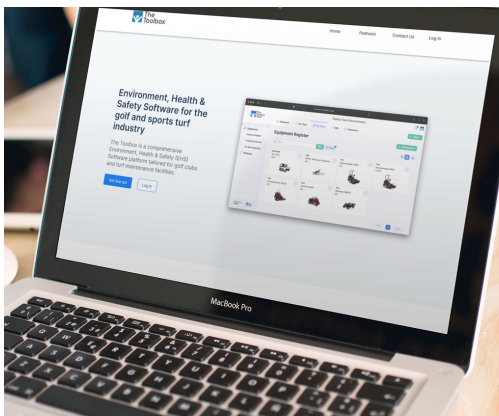

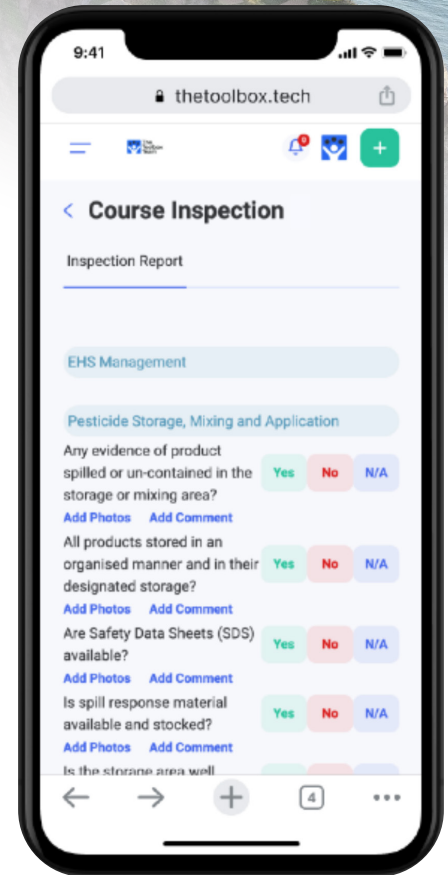

Are you looking to enhance the safety and efficiency of your golf club or turf maintenance facility? Look no further! Introducing The Toolbox, a comprehensive Environment, Health, & Safety (EHS) Software Platform tailor-made for organizations like yours.

### Why Choose The Toolbox?

The Toolbox is an integrated suite of EHS solutions designed to empower organizations in the golf and sports turf industry to create a culture of safety within their work environment. Our platform offers a centralized hub for managing all aspects of environment, health, and safety, streamlining your operations, and ensuring compliance with regulatory requirements.

### Key Benefits for Your Organization:

1. **Centralized Management and Accessibility:** Access The Toolbox platform from anywhere, allowing easy collaboration and access to critical information.
2. **Improved Data Visibility and Decision Making:** Real-time insights into key EHS metrics enable informed decisions and proactive risk management.
3. **Streamlined Employee Management:** Efficiently organize and track employee data, certifications, and training records for compliance and resource allocation.
4. **Employee Qualification and Training Management:** Manage and monitor employee qualifications and training programs for safe and efficient performance.
5. **Equipment Register and Competency Records:** Maintain an up-to-date inventory of equipment and track competency records of qualified personnel.
6. **Comprehensive Chemical Product Management:** Manage chemical products, applications, and usage for safety and environmental compliance.
7. **Hazard and Incident Management:** Identify, manage, and report hazards and incidents to promote a safer workplace.
8. **Risk and Compliance Management:** Stay compliant with regulations, streamline audits, and maintain accurate records for compliance.

## The Toolbox Features in Detail:

**Dashboard:** Get a holistic view of key metrics and compliance status for informed decision-making.

**Employees:** Streamline staff management and administration within the system.

**Qualifications:** Manage required qualifications for employees, ensuring compliance with environment and safety standards.

**Training Schedule:** Seamlessly coordinate and organize staff training activities for enhanced efficiency.

**Equipment:** Track equipment inventory, pre-start inspections, defect monitoring, and operator competency training.

**Products:** Manage chemical product inventory, applications, pesticide use reports, and inventory levels.

**Hazards:** Enhance hazard identification, monitoring, and collaboration for a safer work environment.

**Incidents:** Report, track, and manage workplace incidents efficiently with our comprehensive incident management feature.

**Risk Register:** View, edit, and manage workplace risks in a centralized register for better visibility and control.

**Inspections:** Streamline compliance inspection processes with templates, scheduling, tracking, and reporting.

**Documents:** Efficiently manage and access critical compliance documents, ensuring transparency and accountability.

## Testimonial:

“ **The Toolbox system is the best Health & Safety platform I have seen, and I have seen and used a lot of them!** ”

- Lee Strutt, Director of Agronomy, Cabot Cape Breton
