

Secure Your Club's Operations

Manage your risks before they manage you!

ENHANCE YOUR LEGAL PROTECTION WITH STREAMLINED DIGITAL WAIVERS

Why Waivers?

Having members and guests sign waivers is a critical aspect of risk management for golf clubs. When waivers are not signed, it significantly increases the club's exposure to legal and financial risks.

In the absence of a signed waiver, frivolous claims are more likely to arise even when your club is not negligent.

In some parts of the world, without signed waivers injured parties can more easily obtain a lawyer on contingency (with no upfront fees) to sue the club for damages even when the club isn't negligent.

Make The Change

Switch from traditional paper waivers to our cloud-based eGolf Waiver platform, designed to optimize risk management, enhance customer experiences, and streamline operations at golf courses worldwide.

Top 3 Features & Benefits

- **Suitable for All Courses:** Ideal for all types of golf courses, accommodating both daily fee players and members.
- **Comprehensive Technology:** Includes cart condition reporting, and seamless integrated with **Lightspeed Golf**.
- **Customizable Workflows:** Tailor the system to fit your club's designed member/guest experience and specific operational needs.
