Digital waivers and cart management for golf facilities

PLATFORM OVERVIEW

Every golfer signed. Every cart accounted for.

Signed, time-stamped waivers for every golfer, every cart tied to a named player, and damage documented the moment a cart comes back.

Check-in in under 30 seconds | **Free 30-day trial** | **No new hardware**

15,000 to 17,500
golf cart injuries treated in U.S. emergency rooms every year (U.S. Consumer Product Safety Commission data)

38 to 40%
of all golf cart incidents nationwide involve occupants being ejected from the cart

THE PLATFORM

Accountability for every cart, every round

1 Protect
A signed, time-stamped waiver for every golfer, stored securely and retrievable in seconds if an incident turns into a claim.

2 Track
Each cart is assigned to a named golfer with contact details on file, so you always know who had which cart and when.

3 Recover
Damage is documented with photos on return and linked to the responsible golfer, giving you what you need to recover the cost.

THE RISK

How a frivolous claim plays out

WITHOUT A SIGNED WAIVER

Golfer files a claim → A lawyer takes it on contingency → The insurer settles to avoid a trial → **The club pays the deductible, staff time and higher premiums**

WITH EGOLF WAIVER

Golfer files a claim → The lawyer sees a signed and time-stamped waiver → They ask the golfer for a $7,500+ retainer → **The claim dies before it reaches your insurer**

CLIENT RESULT

$50,000 per year before
$6,000 per year after

A high-profile four-course, 72-hole resort in Michigan with nearly 300 carts cut annual cart damage costs by roughly 88%.

Behaviour simply changed. When golfers know they've signed for a specific cart with their name attached, they drive more carefully.

GURU COLLECTIVE

WAYS TO SIGN

Configured around how your club runs

TABLET MODE

The club's tablet does the work

The golfer signs on site and the waiver is tied to a specific cart.

- Golf shop, bag drop, cart staging or first tee
- Apple iPad or any Android tablet
- Check-in in less than 30 seconds

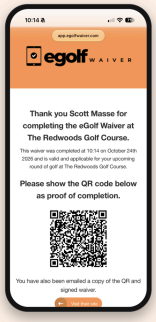

QR MODE

The golfer's phone does the work

Golfers scan, register and sign, then show a confirmation QR to get their cart.

- QR on site or a link in your booking email
- A whole foursome signs at once
- No app to download

Also included: General Waivers (liability only), Member Waivers (sign once a season) and a full admin dashboard.

DEVICES AND INTEGRATIONS

Works with what you already have

TODAY

Your devices

Android tablets, iPads and phones. No proprietary hardware.

LIVE

lightspeed

Waivers go out at booking and show on the tee sheet.

2027

Club Prophet

Integration ready for the 2027 season.

2027

Gallus

Golfers keep their waiver QR in your club's app.

INVESTMENT

One simple price per location

Your investment	Example: 80 carts, 30,000 rounds a year
Monthly subscription	**$249 per month, per location**
Annual equivalent	**$2,988 per year**
One-time setup fee	**$995**
Per cart, per month	**$3.11**
Per round played	**About $0.10**
Multi-course operators	**20% off at 5+ locations**

Plus applicable taxes. Per cart and per round figures are based on the example club. Each facility with its own fleet is a separate location. Seasonal billing options are available.

INSURANCE

Up to 10% off

the liability portion of your policy at renewal

Offered by some insurers to clubs that implement and actively use eGolf Waiver. Worth a call to your broker or agent, as the savings can offset a meaningful portion of the subscription.
