

A Foundation of Purpose

It was 2013, and I was searching for a preschool for my 1 and 3-year-old children. As a former Montessori student and Montessori teacher, I knew exactly what I was looking for, and I could not find it locally.

I knew it was possible to create an environment where children master skills on their own developmental timeline, allowing them to build true intrinsic motivation, self-assurance, and empathy for others.

I grew up in a home where understanding how children learn and grow wasn't just a job, it was dinner table conversation. As a third-generation teacher and the daughter of both a child psychologist and a psychiatrist, I knew from a young age that a child's environment is the key to who they become in the world.

When I couldn't find a school that reflected these values, I decided to build it, drawing on years of administrative leadership and a lifelong commitment to the Montessori method. I believed that if I created a space that truly honored childhood, other families around Owasso would want to be a part of it, too.

In 2014, we opened our doors with eighteen children and a dream. Today, we have grown into a vibrant community of students from toddlers through 8th-grade students.

As my children grew up in this school and are now branching out into the world around them, I am thankful they had the experience of not only a Montessori education, but also our special community here that encourages, inspires, and models a loving, kind way to live in this world. I am filled with pride as I watch the Montessori influence in their choices and behavior on a daily basis. I hope you have this experience with your children one day as well.

Thank you for your interest in Montessori Academy of Owasso. I would love to speak with you about how we could be a positive part of your child's life.
