## On Spotify This Week

In this episode, we explore the science behind early brain development and why the first three years of life are such a critical window for language, attention, and learning.

Drawing from neuroscience research & Montessori philosophy, we look at how screen time in the early years is shown to affect success in elementary school years later.

The Summer Arc is rooted in **Montessori intentionality**, uniting our entire school under one shared theme each week. While the theme is universal, the experience is uniquely tailored to each class's developmental stage. Through a rich daily blend of **art, yoga, and curated literature**, students dive into hands-on **experiments**, sensory **exploration**, and creative problem-solving designed to meet them exactly where they are.
