DIFFERENTIATORS

Building Information Modeling (BIM) allows us to begin every project with precision information from the office to Site Superintendents to our craftsmen and women. Tekla Structures, AutoCad and Revit allows us to see problems in advance enabling our strict adherence to quality, schedule and budget.

5-D Constructability Analysis (length, width, depth, time, budget) allows the Allen Concrete team to identify areas of opportunity in all dimensions.

Internal Logistics Support, heavy construction equipment, placing boom/ concrete pump systems, cranes and skilled personnel are all capabilities that reside within Allen Concrete.

Trimble Robotic Total Stations integrated with Tekla Structures, AutoCad and Revit enables our precision layout and elevation controls resulting in superior quality control.

Procore enables all of our employees to directly communicate at the speed of construction regardless of geographic location.

Experience a leader in high rise construction spanning 3 decades, Allen Concrete has been the turnkey concrete & masonry contractor of choice for over 1.5million square feet of high rise buildings in the last 5 years.

EXPERTISE

Allen Concrete and Masonry serves Florida as the regional leader for complex concrete construction. Licensed as a General Contractor and classified as a small business we provide superior client experience by using a holistic approach for project management, quality, schedule and budget.
