Operational Support & Training Resources

Prepared by:

Suarez Armory

SuarezArmory.com

1. Secure Training Locations

- Access to private ranges and training bays.
- Urban structures suitable for CQC training.
- Industrial or commercial buildings for scenarios training.
- Discreet environments away from public attention.

2. Force-on-Force Role Players

- Vetted civilian role players from training programs.
- Hostage / bystander simulation.
- Controlled OPFOR resistance profiles.
- Repeatable and structured scenario training.

3. Equipment Demonstration Pipeline

- Night vision and thermal equipment evaluation.
- Hands-on testing during training blocks.
- Access to partner equipment through sponsor network.
- Performance feedback for manufacturers.

4. Training & Operational Support Capabilities

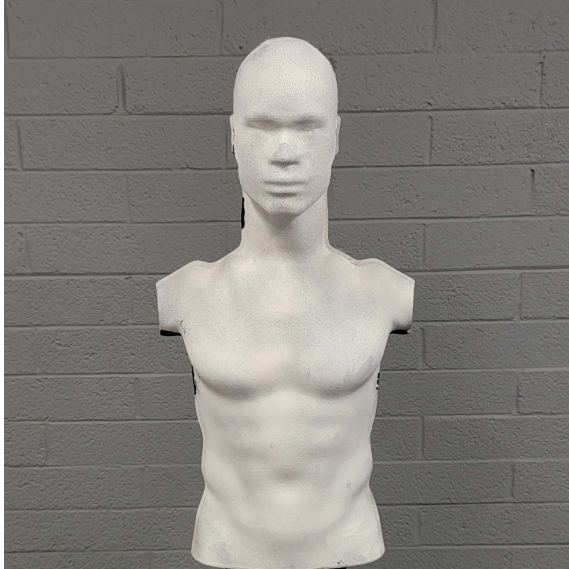

- Simulation / UTM
- Helicopter Insertion Training
- Live Fire Ranges
- NVG / Thermal Training
- Instructor Contracts
- Performance feedback for manufacturers.

5. Environmental Stress Tools

- Training smoke environments.
- Distraction devices.
- Stress inoculation scenarios.
- Enhanced realism during CQB operations.

6. Reactive Target Systems

- Steel & Rubber target systems.
- Reactive hostage targets.
- Precision and speed training setups.
- Portable range target infrastructure.

7. Low-Light & Night Training Blocks

- Dedicated low-light CQC sessions.
- White Light vs Night Vision comparison.
- Indoor and outdoor night training.
- Light discipline scenarios.

8. Medical Integration Training

- TCCC style casualty simulations.
- Role players simulating wounded personnel.
- Shooting-to-medical response transitions.
- Decision-making under stress.

9. Civilian Interaction Scenarios

- Crowd movement simulations.
- Hostile vs non-compliant civilian identification.
- Public environment decision-making.
- Scenario-based training environments.

10. Equipment Testing & Feedback

- Real-world gear testing.
- Structured operator feedback collection.
- Data summaries for equipment manufacturers.
- Evaluation of emerging technology.

11. Logistics & Operational Support

- Range setup and teardown support.
- Training logistics coordination.
- Equipment staging.
- Hydration and administrative support.
- Dedicated closed-door training days when required.
